

# OECD Annual National Accounts Data Base Manual

December 2002

This version of the Help documentation is preliminary and does not necessarily represent the current Global Insight database. The availability of specific data may not be reflected in this version because of ongoing changes to the data.

# **NATIONAL ACCOUNTS of OECD Countries**

## **Volume I & II**

# Annual NATIONAL ACCOUNTS of OECD Countries

## GENERAL DESCRIPTION

The present publication has been prepared from statistics reported to the OECD by Member countries in their answers to national accounts questionnaires. These questionnaires are designed to collect internationally comparable data according to the 1993 SNA, "*System of National Accounts 1993*". Although Member countries have all agreed to adopt the 1993 SNA, a number are still using the 1968 SNA or can give data for only a few years according to the 1993 SNA. There are numerous differences between the two systems as regards valuation, classifications and definitions, and these must be taken into account when comparing data compiled according to different systems. The system used by each country is listed in annex I.

National account aggregates are shown at both current and constant 1995 prices. To facilitate inter-country comparisons the constant price data are shown at the price levels of 1995. For countries that do not use 1995 as the base year calculating their constant prices, the constant price data for each aggregate have been scaled up by the ratio in 1995 of the current value of that aggregate to its value at the prices of the base year used by the country concerned. This scaling procedure in no way alters the fact that the constant price series concerned still reflect the relative prices of the years actually used.

The period covered begins in 1970 up to whenever the data are available.

## CONTENTS

This release contains standardized annual national accounts statistics for 29 OECD Member countries from 1970 up to whenever available.

All the national account data refer to calendar years except for Australia and New Zealand which use fiscal years in their National Accounts. All the data are expressed in **millions** of national currency, except data referring to employment (tables 5, 6, 9a and 9b) which are expressed in **thousands**.

For each country there are 748 variables (series) arranged in 12 standard tables. The full description of the 12 tables is included as well as a complete list of all variables and their series codes.

## **1. Detailed tables (in millions of national currency)**

**Table 1.** Gross domestic product: expenditure approach, current prices and 1995 prices.

**Table 2.** Gross domestic product: output approach, current prices and 1995 prices.

**Table 3.** Gross domestic product: income approach.

**Table 4.** Disposable income, saving and net lending.

**Table 7.** Gross value added at basic prices by industry, in 31 industries, current prices and 1995 prices.

**Table 8.** Components of value added by industry, in 31 industries:

- Compensation of employees,
- Wages and salaries,
- Gross operating surplus and gross mixed income,
- Other taxes less other subsidies on production.

**Table 10.** Gross fixed capital formation by industry, in 31 industries, current prices and 1995 prices.

**Table 11.** Final consumption expenditure of households, current prices and 1995 prices.

**Table 12.** Simplified general government accounts.

## **2. Population and employment (in thousands of units)**

**Table 5.** Population and employment in persons, national concept.

**Table 6.** Employment in persons and in full-time equivalents by industry, domestic concept.

**Table 9a.** Employment by industry, in 31 industries, in persons.

**Table 9b.** Employment by industry, in 31 industries, in full-time equivalents.

## **ABBREVIATIONS used in series titles**

### 1. abbreviations used in series titles of tables 1 to 4, 7, 8, 10 to 12

C.	Current prices
K.	Constant prices
COM-	Compensation of employees
GF-	Gross fixed capital formation
GFCF-	Gross fixed capital formation
VA-	Value added
WS-	Wages and salaries
GOS-	Gross operating surplus and gross mixed income
OTS-	Other taxes less other subsidies on production
GG.	General government
Govt.	Government
NPISH	Non-profit institutions serving households
FISIM	Financial Intermediation Services Indirectly Measured

2. abbreviations used in series titles of table 6, 9a and 9b

ETOP- Employment total in persons  
EEMP- Employees in persons  
ESEP- Self-employed in persons  
ETOF- Employment total in full-time equivalents  
EEMF- Employees in full-time equivalents  
ESEF- Self-employed in full-time equivalents

**Explanations of the MEASURES**

(blank) Current prices, national currency  
Z 1995 prices, national currency  
P Persons  
F Full-time equivalents

## Mnemonics Design

The mnemonic scheme used for the ANIA Database follows the codes supplied by the OECD. Understanding how the series codes are constructed will aid the user in identifying specific characteristics on the data.

Series codes are alphanumeric in character and range in size from six to fifteen characters and can be broken down into three distinct sections. The series codes are arranged in the following format:

**A144B1\_GEZ.A**

<u>Position</u>	<u>Description</u>
A144B1_GEZ	<u>Periodicity Code</u>
	A denotes annual series
A <b>144</b> B1_GEZ	<u>Country or Aggregate Code</u>
	<b>144</b> is the three digit country code for Sweden
A144 <b>B1</b> _GEZ	<u>Subject and Measure Codes</u>

Two to eleven characters following the three-digit country code represent the series suffix. **B1\_GEZ** is the series suffix for Gross domestic product (expenditure approach) in constant 1995 prices. The base year of the constant price series will vary from country to country, as well as the unit of measurement. Appended to a subject code is the measure code. In some cases these are blank. See Explanations of the MEASURES above.

Please keep in mind that, once again, not all series are available in the database for every country.
