

GLOBAL INSIGHT

U.S. Macroeconomic Database Manual

Volume 2

General Macroeconomic Indicators

December 2005

This version of documentation is preliminary and does not necessarily represent the current Global Insight databases. The availability of specific data may not be reflected in this version because of ongoing changes to the data. For example, series codes may have been added or dropped and descriptive information (leftmost column) may have changed. Please direct any questions concerning the accuracy or completeness of the information or the availability of data to Client Resource Center at 1 800 933 3374 or email to support@globalinsight.com.

TABLE OF CONTENTS

TABLE OF CONTENTS	II
INTRODUCTION	VIII
MNEMONICS DESIGN	IX
1 – INDUSTRIAL OUTPUT	1
1.1 – INDUSTRIAL PRODUCTION	2
Market and Industry Group Summary	3
Industry Subtotals and Individual Series	6
Special Aggregates and Selected Detail	12
Electric Power Use by Manufacturing and Mining	13
Miscellaneous	14
1.2 – CAPACITY UTILIZATION	15
Capacity Utilization and Industrial Capacity	16
1.3 – MANUFACTURERS' SHIPMENTS, INVENTORIES, AND ORDERS	18
Value of Manufacturers' Shipments and Inventories	19
Value of Manufacturers' New and Unfilled Orders	21
Value of Manufacturers' Shipments, New Orders, Unfilled Orders, and Total Topical Series	22
Value of Manufacturers' Inventories by Stage of Fabrication, by Industry	23
Ratio of Manufacturers' Inventories to Shipments and Unfilled Orders to Shipments, by Industry Group	25
1.4 – GROSS PRODUCT ORIGINATING AND FACTOR SHARES	26
Gross Product Originating and Factor Shares	27
1.5 – MISCELLANEOUS	30
Miscellaneous Industry Statistics	31
2 – INVESTMENT/CONSTRUCTION	32
2.1 – CAPITAL STOCK/FIXED ASSETS	33
Current-Cost Net Stock of Fixed Assets and Consumer Durable Goods	34
Chain-Type Quantity Indexes for Net Stock of Fixed Assets and Consumer Durable Goods	35
Current-Cost Net Stock of Private Fixed Assets, Equipment and Software, and Structures by Type	36
Chain-Type Quantity Indexes for Net Stock of Private Fixed Assets, Equipment and Software, and Structures by Type	38
Current-Cost Net Stock of Private Fixed Assets by Industry	40
Current-Cost Net Stock of Private Equipment and Software by Industry	43
Current-Cost Net Stock of Private Structures by Industry	46
Chain-Type Quantity Indexes for Net Stock of Private Fixed Assets by Industry	49
Chain-Type Quantity Indexes for Net Stock of Private Equipment and Software by Industry	52
Chain-Type Quantity Indexes for Net Stock of Private Structures by Industry	52
Current-Cost Net Stock of Private Nonresidential Fixed Assets by Industry Group and Legal Form of Organization	59
Chain-Type Quantity Indexes for Net Stock of Private Nonresidential Fixed Assets by Industry Group and Legal Form of Organization	60
Current-Cost Net Stock of Residential Fixed Assets by Type of Owner, Legal Form of Organization, Industry, and Tenure Group	62
Chain-Type Quantity Indexes for Net Stock of Residential Fixed Assets by Type of Owner, Legal Form of Organization, Industry, and Tenure Group	63
Current-Cost Net Stock of Government Fixed Assets	64
Chain-Type Quantity Indexes for Net Stock of Government Fixed Assets	66
Current-Cost Net Stock of Consumer Durable Goods	69
Chain-Type Quantity Indexes for Net Stock of Consumer Durable Goods	70
Real Net Stock of Fixed Assets and Consumer Durable Goods	71
2.2 – PRIVATE FIXED INVESTMENT IN EQUIPMENT AND SOFTWARE	72
Private Fixed Investment in Equipment and Software	73

2.3 – CONSTRUCTION STATISTICS	75
Value of New Construction Put-in-Place	76
Value of Private Construction Put-in-Place	78
Value of State and Local Public Construction Put-in-Place	80
Value of Federal Construction Put-in-Place	82
Construction Indexes.....	83
2.4 – HOUSING STATISTICS	84
New Privately Owned Housing Units Started.....	85
New Privately Owned Housing Units Started by Building Permits.....	86
New Privately Owned Housing Units Including Mobile Homes Shipped.....	87
New Privately Owned Housing Units Authorized, but Not Started, at End of Period.....	88
New Privately Housing Units Authorized by Building Permits.....	89
New Privately Owned Housing Units Under Construction and Completed.....	91
New Single-Family Homes Sold and For Sale	92
National Existing Home Sales	93
Existing Single-Family Home Sales	94
Existing Condo and Co-Op Sales	95
National Sales Price of Existing Homes	96
Sales Price of Existing Single-Family Homes	97
Sales Price of Existing Condo/Co-Op Homes.....	98
Dollar Volume of Existing Single-Family Home Sales.....	99
Pending Home Sales Index.....	100
Housing Inventory	101
Vacancy Rates and Indexes.....	102
Miscellaneous.....	103
3 – TRADE.....	105
3.1 – MANUFACTURING AND TRADE SALES AND INVENTORIES	106
Real Manufacturing and Trade Sales and Inventories	107
Real Manufacturing Inventories by Stage of Fabrication	109
Real Change in Private Inventories by Industry	110
Change in Book Value by Industry.....	111
Manufacturing and Trade Sales and Inventories	112
3.2 – WHOLESALE TRADE	113
Sales and Inventories of Merchant Wholesalers.....	114
Wholesale Inventory/Sales Ratios	115
3.3 – RETAIL TRADE	116
Monthly Retail Sales and Food Services by Kind of Business.....	117
End-of-Month Retail Inventories by Kind of Business	120
Retail Inventory/Sales Ratios	121
BEA Retail and Food Service Sales.....	122
BEA Retail and Food Service Sales in Chained Dollars	124
Chain-Type Price Indexes for BEA Real Retail and Food Service Sales	126
Miscellaneous.....	128
4 – PRICES	129
4.1 – PRODUCER PRICE INDEXES	130
Major Commodity and Special Groupings by Stage of Processing	131
Selected Commodity Groupings by Stage of Processing	133
PPI for Selected Commodity Groupings	138
PPI for the Net Output of Selected Industries and Industry Groups	140
PPI by Stage of Processing, Seasonally Adjusted.....	143
Miscellaneous.....	145
4.2 – CONSUMER PRICE INDEX.....	146
All Urban Consumers	147
Urban Wage Earners and Clerical Workers	150
Annual Consumer Price Indexes.....	153

4.3 – DEPARTMENT STORE INVENTORY PRICE INDEX.....	154
Department Store Inventory Price Index	155
4.4 – SPOT PRICE INDEXES	156
Spot Prices and Price Indexes	157
Spot Market, Futures Price, and Commodity Price Indexes	158
4.5 – U.S. IMPORT AND EXPORT PRICE INDEXES.....	159
Import Price Indexes for Selected Categories of Goods by End-Use	160
Export Price Indexes for Selected Categories of Goods by End-Use.....	161
Import Price Indexes for Selected Categories of Goods by SITC.....	162
Export Price Indexes for Selected Categories of Goods by SITC.....	164
U.S. Import Price Indexes by Locality of Origin.....	166
Import and Export Price Indexes for Selected Categories of Goods by End-Use	167
5 – CONSUMER/DEMOGRAPHIC	168
5.1 – PERSONAL INCOME	169
Personal Income and Its Disposition.....	170
Personal Income and Its Disposition, Percent Change from Preceding Period.....	172
Real Personal Consumption Expenditures by Major Type of Product.....	173
Price Indexes for Personal Consumption Expenditures: Level and Percent Change from Preceding Period.....	174
Real Disposable Personal Income and Real Personal Consumption Expenditures: Percent Change from Month One Year Ago.....	175
Price Indexes for Personal Consumption Expenditures: Percent Change from Month One Year Ago	176
Miscellaneous.....	177
5.2 – PERSONAL CONSUMPTION EXPENDITURES	178
Personal Consumption Expenditures by Major Type of Product and Expenditure	179
Real Personal Consumption Expenditures by Major Type of Product and Expenditure.....	181
Chain-Type Price Indexes for Personal Consumption Expenditures by Major Type of Product and Expenditure.....	183
Chain-Type Price Indexes for Personal Consumption Expenditures	185
Personal Consumption Expenditures by Type of Product	197
Personal Consumption Expenditures in Chained Dollars	207
5.3 – POPULATION	217
Annual Population Estimates and Projections	218
Miscellaneous.....	222
6 – EMPLOYMENT	224
6.1 – EMPLOYMENT SITUATION: HOUSEHOLD SURVEY.....	225
Employment Status of the Civilian Population by Sex and Age.....	227
Employment Status of the Civilian Population by Race, Sex, and Age	229
Employment Status of the Hispanic or Latino Population by Sex and Age	231
Employment Status of the Civilian Population 25 Years and Over By Educational Attainment	232
Employed Persons by Class of Worker and Part-Time Status	233
Selected Employment Indicators.....	234
Selected Unemployment Indicators, Seasonally Adjusted.....	236
Unemployed Persons by Reason for Unemployment	238
Unemployed Persons By Duration of Unemployment.....	239
Employed and Unemployed Persons by Occupation, Not Seasonally Adjusted	240
Unemployed Persons by Industry, Not Seasonally Adjusted.....	241
Alternative Measures of Labor Underutilization	242
Persons not in the Labor Force and Multiple Jobholders by Sex.....	243
Employment Smoothed for Population Controls	245
6.2 – EMPLOYMENT SITUATION: ESTABLISHMENT DATA	246
Employees on Nonfarm Payrolls by Industry Sector and Selected Industry Detail	247
Average Weekly Hours of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Industry Sector and Selected Industry Detail	253

Average Hourly Earnings of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Industry Sector and Selected Industry Detail	255
Average Weekly Earnings of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Industry Sector and Selected Industry Detail	257
Indexes of Aggregate Weekly Hours of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Industry Sector and Selected Industry Detail.....	259
Indexes of Aggregate Weekly Payrolls of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Industry Sector and Selected Industry Detail.....	261
Diffusion Indexes of Employment Change	262
6.3 – EMPLOYMENT AND EARNINGS: HOUSEHOLD SURVEY	263
Employed Persons by Class of Worker and Part-Time Status	265
Civilian Noninstitutional Population by Age, Sex, and Race	266
Civilian Labor Force Level by Age, Sex, and Race.....	268
Employment-Population Ratio by Age, Sex, and Race.....	270
Participation Rate by Age, Sex, and Race	272
Employed Persons by Age, Sex, and Race	274
Unemployed Persons by Age, Sex, and Race	276
Unemployment Rate by Age, Sex, and Race.....	278
Persons Not in Labor Force by Age, Sex, and Race	280
Employed Persons by Occupation and Sex.....	281
Persons at Work in Non-agricultural Industries.....	284
Persons at Work 1 to 34 Hours in All and Nonagricultural Industries by Reason for Working Less Than 35 Hours and Usual Full- or Part-Time Status	287
Percent of Distribution by Duration of Unemployment and by Reason For Unemployment.....	289
Unemployed Total and Full-Time Workers by Duration of Unemployment.....	291
Persons Not in Labor Force by Desire and Availability for Work, Age, and Sex	292
Persons with a Job But Not at Work	295
6.4 – EMPLOYMENT AND EARNINGS: ESTABLISHMENT DATA	296
Women Employees on Nonfarm Payrolls by Major Industry Sector and Selected Industry Detail...	297
Production or Non-Supervisory Workers on Private Nonfarm Payrolls by Major Industry Sector and Selected Industry Detail.....	299
Production or Non-Supervisory Workers on Private Nonfarm Payrolls by Detailed Industry.....	301
Average Hourly and Weekly Earnings of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Detailed Industry	328
Average Hourly and Weekly Earnings of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Major Industry and Selected Industry Detail, in Constant Dollars.....	355
Average Weekly Hours of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Industry Sector and Selected Industry Detail, Seasonally Adjusted.....	356
Average Weekly Hours of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Detailed Industry, Not Seasonally Adjusted	358
Average Hourly Earnings, Excluding Overtime, of Production Workers on Manufacturing Payrolls	384
Hours of Wage and Salary Workers on Nonfarm Payrolls by Major Industry	385
Average Weekly Overtime of Production Workers on Manufacturing Payrolls.....	413
6.5 – PRODUCTIVITY AND COSTS.....	422
Productivity and Costs.....	423
Multifactor Productivity Trends	426
6.6 – EMPLOYMENT COST INDEX	427
Employment Cost Index for Total Compensation, Wages and Salaries, and Benefit Costs by Industry and Occupational Group.....	428
Employment Cost Index for Total Compensation for Civilian and State and Local Government Workers by Industry and Occupational Group.....	429
Employment Cost Index for Total Compensation for Private Industry Workers by Industry and Occupational Group.....	430
Employment Cost Index for Total Compensation for Private Industry Workers by Bargaining Status, Region, and Area Size.....	432
Employment Cost Index for Wages and Salaries for Civilian and State and Local Government Workers by Industry and Occupational Group.....	433

Employment Cost Index for Wages and Salaries for Private Industry Workers by Industry and Occupational Group	434
Employment Cost Index for Wages and Salaries for Private Industry Workers by Bargaining Status, Region, and Area Size	436
Employment Cost Index for Benefits for Civilian, State and Local Government, and Private Industry Workers by Industry, Occupational Group, and Bargaining Status	437
Employment Cost Index for Total Compensation, Wages and Salaries and Benefit Costs in Aerospace Manufacturing	438
6.7 – BUSINESS EMPLOYMENT DYNAMICS	439
Private Sector Gross Job Gains and Job Losses	440
Private Sector Establishments by Direction of Employment Change	441
6.8 – JOB OPENINGS AND LABOR TURNOVER SURVEY (JOLTS)	442
Job Openings and Labor Turnover	443
7 – FINANCIAL	449
7.1 – QUARTERLY FINANCIAL STATISTICS	450
Quarterly Financial Report for Manufacturing, Mining and Trade Coporation	451
7.2 – MISCELLANEOUS	454
Miscellaneous Financial Statistics	455
7.3 – STOCK AND BOND ACTIVITY	457
Stock and Bond Activity	458
8 – GOVERNMENT	459
8.1 – FEDERAL GOVERNMENT BUDGET OUTLAYS AND RECEIPTS	460
Federal Government Budget Outlays and Receipts by Source	461
Outlays of the U.S. Government	464
9 – INTERNATIONAL	466
9.1 – U.S. INTERNATIONAL MERCHANDISE TRADE	467
U.S. International Trade in Goods and Services	468
U.S. Trade in Goods	469
U.S. Services by Major Category	470
Exports and Imports of Goods by Principal End-Use Category	471
Exports and Imports of Goods by Principal End-Use Category in Constant Dollars	472
Exports and Imports by End-Use Category and Commodity	473
Exports, Imports, Balance of Goods, Petroleum and Non-Petroleum End-Use Category	479
U.S. International Trade by Selected Countries and Areas	480
Exports and Imports of Goods by Principal SITC Commodities	482
Exports and Imports of Motor Vehicles and Parts by Selected Countries	485
Exports and Imports of Goods by SITC Commodity Groupings	486
U.S. Trade in Goods, by Principal End-Use Category, Balance of Payments Basis, Excluding Military	487
Quarterly U.S. Trade in Goods, Balance of Payments Basis	490
Miscellaneous	491
9.2 – INTERNATIONAL TRANSACTIONS	492
U.S. International Transactions	493
U.S. International Transactions by Area	496
U.S. Net International Investment Position	499
U.S. Direct Investment Abroad	501
Foreign Direct Investment in the U.S.	503
Transactions in Foreign Long-Term Securities	505
Transactions in U.S. Long-Term Securities	506
Claims on Foreigners Reported by U.S. Nonbanking Concerns	508
Liabilities to Foreigners Reported by U.S. Nonbanking Concerns	509
Claims on Foreigners Reported by U.S. Banks and Securities Brokers	510

9.3 – CAPITAL MOVEMENTS.....	512
Foreign Purchases and Sales of Long-Term Securities by Type.....	513
Foreign Purchases and Sales of Long-Term Securities by Type and Country.....	515
Major Foreign Holders of U.S. Treasury Securities.....	519
9.4 – INTERNATIONAL MANUFACTURING PRODUCTIVITY.....	521
International Comparisons of Manufacturing Productivity.....	522
9.5 – INTERNATIONAL COMPARISONS OF HOURLY COMPENSATION COSTS FOR PRODUCTION WORKERS IN MANUFACTURING.....	523
Indexes of Hourly Compensation Costs In U.S. Dollars for Production Workers in Manufacturing, 30 Countries or Areas and Selected Economic Groups.....	525
Hourly Compensation Costs in U.S. Dollars for Production Workers in Manufacturing, 30 Countries or Areas and Selected Economic Group.....	527
Indexes of Hourly Compensation Costs In U.S. Dollars for Production Workers in Manufacturing, 30 Countries or Areas and Selected Economic Groups.....	529
Hourly Compensation Costs In National Currency for Production Workers in Manufacturing, 30 Countries or Areas.....	530
Indexes of Hourly Compensation Costs In National Currency for Production Workers in Manufacturing, 30 Countries or Areas.....	532
Indexes of Hourly Direct Pay for Production Workers in Manufacturing, 30 Countries or Areas and Selected Economic Groups.....	533
Hourly Direct Pay in U.S. Dollars for Production Workers in Manufacturing, 30 Countries or Areas and Selected Economic Groups.....	535
Hourly Direct Pay in National Currency for Production Workers in Manufacturing, 30 Countries or Areas.....	537
Indexes of Pay for Time Worked for Production Workers in Manufacturing, 30 Countries or Areas.....	539
Pay for Time Worked In U.S. Dollars for Production Workers in Manufacturing, 30 Countries or Areas	540
Pay for Time Worked In National Currency for Production Workers in Manufacturing, 30 Countries or Areas.....	541
10 – MISCELLANEOUS.....	542
10.1 – TRANSPORTATION STATISTICS.....	543
Transportation Statistics.....	544
Automobiles Statistics.....	546
10.2 – MISCELLANEOUS STATISTICS.....	549
Unemployment Insurance and Job Layoffs.....	550
Diffusion Indexes.....	551
Consumer and Business Sentiment.....	561
Miscellaneous.....	562

INTRODUCTION

The general macroeconomic indicators database manual represents the second of a two-volume set, which documents Global Insight's (formerly DRI-WEFA) coverage of historical U.S. macroeconomic data. The US database, along with national income and product accounts (NIPA), Business Cycle Indicators (BCI) and Annual Survey of Manufactures (ASM) databases, provides users with the key variables needed to analyze both short-term and long-term economic trends.

The data in the US database are collected primarily from government agencies and trade associations with supplementary series from private sources. The series are updated according to the data frequency on a weekly, monthly, quarterly or annual basis. Information released by the government is made available online within hours.

Volume 2 is divided into ten major sections with each section broken down by specific data set. Each data set is preceded by an outline, which provides the following information:

- Description
- Source
- Update schedule
- Revision information
- Collection method
- Other relevant material

Each outline describes what level of coverage is provided, what the approximate release date is for a given set of data, how much data are released at that time, when benchmark revisions occur, and how the data are collected. Detailed information can be found on subsequent pages regarding specific series codes and their descriptions, start dates, and other relevant information.

MNEMONICS DESIGN

In general, the first set of characters of each mnemonic refers to the category to which the data belong. Subsequent characters identify the series and distinguish it from other series in its general category. Other groups of characters differentiate real dollar quantities and price deflators. By breaking the mnemonic syntax into meaningful blocks of characters, powerful system capabilities such as context look-up can be utilized.

Because of the amount of data involved, it is impossible to list all of the naming conventions employed in the mnemonic structure. Examples of the system and some of the key characters are shown below.

STANDARD CHARACTERS

CE CONSUMPTION EXPENDITURES

CED Consumption Expenditures, Durable Goods
CEN Consumption Expenditures, Nondurable Goods
CES Consumption Expenditures, Services

EM EMPLOYMENT

EMC Employed Civilians
EME Number Of Employees
EMP Production Workers
EMS Self-Employed Persons
EMW Women Employees

EX EXPORTS

G GOVERNMENT

GE Government Expenditures
GP Government Purchases

HR HOURS

HRWP Average Weekly Hours Of Production Workers

I INVESTMENT

IG Gross Investment
II Change In Business Inventories
IP Investment, Nonresidential (Producers)
IR Investment, Residential

IM IMPORTS

IMC Imports, Census Basis
IMB Imports, Balance Of Payments Basis

K STOCK

KI Inventory

N NUMBER OF PEOPLE

NPN Noninstitutional Population
NLC Number In Civilian Labor Force
NAW Number At Work

STANDARD CHARACTERS (CONTINUED)**OR** ORDERS

ORN New Orders
ORU Unfilled Orders

P PRICE

PCI Consumer Price Index
PKD Department Store Inventory Price Index
PPI Producer Price Index
PUV Unit Price (Value)

Q QUANTITY**R** RATE OR RATIO

RKU Capacity Of Utilization Rate

S SALES OR SHIPMENTS

SHP Shipments
SR Retail Sales
SW Wholesales Sales
SV Savings

TR TRANSFER PAYMENTS**TX** TAXES (GOVERNMENT RECEIPTS)**U** UNIT

UP Units Of Production
US Unit Sales
USHP Units Of Shipments

W WAGES, WAGE RATES, SUPPLEMENTS

WD Wage And Salary Disbursements
WRHP Average Hourly Earnings Of Production Workers
WRWP Average Weekly Earnings Of Production Workers
WS Supplements To Wages And Salaries

Y INCOME

YDV Dividend Income
YF Farm Income
YI Interest Income
YN National Income
YOL Other Labor Income
YP Personal Income
YPR Proprietor's Income
YR Rental Income
YSE Proprietors' Income

OTHER CONVENTIONS

- A** Annual Data Indicator (Prefix)
PD Implicit Price Deflator (Prefix)
96 Constant Dollar Indicator (Suffix)
_U Data Are Unadjusted (Suffix)
X Excluding (E.G., XLFT = Total Persons Not In Labor Force; NFMXHOU = Nonfarm Less Housing)

BUILDING SERIES CODES

The data category of civilian labor force level illustrates how the logical structure of the mnemonic system permits the powerful use of system capabilities. The mnemonics for civilian labor force level can be broken down into five blocks, each of which defines a narrower subset of the data.

<u>PREFIX</u> (OPTIONAL)	<u>ROOT</u> (REQUIRED)	<u>SUBSET</u> (REQUIRED)	<u>SUBCATEGORY</u> (OPTIONAL)	<u>SUFFIX</u> (OPTIONAL)
A	NLC	TT	1619	_U ¹
Q		MT	GE20	
		FT		

Examples of building series codes are given below:

NLCTT - CIVILIAN LABOR FORCE LEVEL, TOTAL, SA
NLCTT_U - CIVILIAN LABOR FORCE LEVEL, TOTAL, NSA
NLCMT - CIVILIAN LABOR FORCE LEVEL, MALES, SA
NLCMT1619 - CIVILIAN LABOR FORCE LEVEL, MALES, 16-19 YEARS, SA
QNLNLCMT1619 - CIVILIAN LABOR FORCE LEVEL, MALES, 16-19 YEARS, SA, QUARTERLY

CONVENTIONS APPLYING TO ALL DATA TYPES

1. Current dollar series codes comprise the root mnemonic, i.e., no prefix or suffix
2. Constant dollar series codes contain a suffix indicating the base year, e.g. '96'
3. Implicit price deflator series codes contain a prefix of 'PD'
4. Industry codes are consistent across data types

For specific series codes, however, please refer to the respective data table.

¹ Where seasonality is not a factor, such as in population data or in annual data, the suffix _U is not used.

1 – INDUSTRIAL OUTPUT

1.1 – Industrial Production

DESCRIPTION

The industrial production (IP) index measures the real output of the manufacturing, mining, and electric and gas utilities industries; the reference period for the index is 1997. For the period since 1997, the total IP index has been constructed from 295 individual series based on the 1997 North American Industrial Classification System (NAICS) codes. These individual series are classified in two ways: (1) market groups, and (2) industry groups. Market groups consist of products and materials. Total products are the aggregate of final products, such as consumer goods and equipment, and intermediate products (which are inputs to nonindustrial sectors). Materials are inputs in the manufacture of products. Major industry groups include three-digit NAICS industries and aggregates of these industries – for example, durable and nondurable manufacturing, mining, and utilities. A complete description of the market and industry structures, including details regarding series classification is available on the Board's web site.

SOURCE

Federal Reserve Board, [Industrial Production](#) (G.17) press release and the G.17 Supplement

UPDATE SCHEDULE

Approximately the 15th of each month

REVISIONS

On December 5, 2002, the Federal Reserve Board published a revision to the index of industrial production (IP), the related measures of capacity and capacity utilization, and the data on industrial use of electric power. The revised estimates are classified according to the 2002 North American Industrial Classification System (NAICS); previously, the estimates from 1987 forward were classified according to the 1987 Standard Industrial Classification system (SIC). NAICS changes the SIC system's industry composition of manufacturing. To preserve the continuity of the production, capacity, and utilization rate measures featured in the Federal Reserve's G.17 statistical release, portions of SIC 27 (printing and publishing) and SIC 24 (lumber and products) that are not classified in manufacturing under NAICS continue to be included in the overall IP index and capacity utilization.

Market and Industry Group Summary

Database: US
 Frequency: Monthly
 Units: Index base: 1997=100
 Adjustment: Seasonally and not seasonally adjusted
 Series Prefix: **IPS** Seasonally adjusted
 IPN Not seasonally adjusted

Manufacturing (NAICS) (continued)		
Nondurable manufacturing	GMFN	1972:1
Food, beverage, and tobacco products	G311A2	1967:1 ²
Textile and product mills	G313A4	1972:1
Apparel and leather	G315	1972:1
Paper	G322	1972:1
Printing and support	G323	1972:1
Petroleum and coal products	G324	1972:1
Chemical	G325	1972:1
Plastics and rubber products	G326	1948:1 ²
Other manufacturing (non-NAICS)	GMFO	1972:1
Mining	G21	1972:1
Utilities		
Electric and gas	G2211A2	1972:1
Electric power generation, transmission and distribution	G2211	1967:1 ²
Natural gas distribution	G2212	1967:1 ²

¹ Consists of those industries included in the North American Industry Classification System (NAICS) definition of manufacturing plus those industries – logging and newspaper, periodical, book and directory publishing – that have traditionally been considered to be manufacturing and included in the industrial sector.

² Start date for prefix IPN begins in 1972:1

1.2 – Capacity Utilization

DESCRIPTION

The Federal Reserve Board constructs estimates of capacity and capacity utilization for industries in manufacturing, mining, and electric and gas utilities. For a given industry, the capacity utilization rate is equal to an output index (seasonally adjusted) divided by a capacity index. The Federal Reserve Board's capacity indexes attempt to capture the concept of sustainable maximum output – the greatest level of output a plant can maintain within the framework of a realistic work schedule, after factoring in normal downtime and assuming sufficient availability of inputs to operate the capital in place.

SOURCE

Federal Reserve Board, Industrial Production and Capacity Utilization (G.17) press release and the G.17 Supplement

UPDATE SCHEDULE

Approximately the 15th of each month

REVISIONS

On December 5, 2002, the Federal Reserve Board published a revision to the index of industrial production (IP), the related measures of capacity and capacity utilization, and the data on industrial use of electric power. The revised estimates are classified according to the 2002 North American Industrial Classification System (NAICS); previously, the estimates from 1987 forward were classified according to the 1987 Standard Industrial Classification system (SIC). NAICS changes the SIC system's industry composition of manufacturing. To preserve the continuity of the production, capacity, and utilization rate measures featured in the Federal Reserve's G.17 statistical release, portions of SIC 27 (printing and publishing) and SIC 24 (lumber and products) that are not classified in manufacturing under NAICS continue to be included in the overall IP index and capacity utilization.

1.3 – Manufacturers' Shipments, Inventories, and Orders

DESCRIPTION

Monthly data on manufacturers' shipments, inventories (end of month) and orders are available for various NAICS classifications. The data measure current economic activity in the domestic manufacturing industry and are also used as an indicator of future economic conditions. Value of shipments represents net selling values at the plant level. Inventories are reported on a current cost basis.

New orders are net of cancellations received during the month on orders previously reported. They include orders received and filled during the month as well as orders received for future delivery. Unfilled orders at the end of the reporting period are equal to unfilled orders at the beginning of the period plus net new orders received less net shipments. Factory shipments by type of appliance are also found in this section.

SOURCE

Bureau of the Census, Manufacturers' Shipments, Inventories, and Orders, M3-1

UPDATE SCHEDULE

Monthly, usually at the beginning of the month

REVISIONS

A preliminary estimate is published for the current month. In addition, one to two months' previous data may be revised in any given month.

Shipments and inventories are benchmarked to annual data as the Annual Survey of Manufactures and the Census of Manufactures become available. Benchmark revisions usually occur in May-June and include recalculation of seasonal factors. Such revisions usually cover a minimum of five years.

A Census of Manufactures is taken every five years resulting in a more extensive revision to the data. Because there is a long lag from the time the census is taken to the time it is made available, up to seven years may be incorporated in this type of revision. When a census is incorporated into the data, there is a considerable delay in the publishing of the benchmark.

COLLECTION METHOD

Information is collected from most manufacturing companies with 1,000 employees or more. The survey also includes selected smaller companies in various industry categories in order to strengthen the sample coverage. Most large diversified companies file separate reports for divisions that operate in different industrial areas.

1.4 – Gross Product Originating and Factor Shares

DESCRIPTION

Data are available for the industries, which measure the amount of gross national product (current and constant dollars), compensation of employees, net interest, capital consumption allowances, indirect business taxes and business transfer payments, and profit type income originating in each of these industries. Quantity indexes and the implicit deflator are also available using 1996 as the base year.

SOURCE

Bureau of Economic Analysis, unpublished data

UPDATE SCHEDULE

Annual. Usually available shortly after the July National Income and Product Accounts revision.

REVISIONS

Revisions reflect the same time frame as the National Income and Product Accounts.

COLLECTION METHOD

Information that is published is based on company data. Detail is based on establishment data.

NOTE

The data are entirely consistent with the National Income and Product Account totals emanating from the comprehensive NIPA revision in December 1999, and subsequent updates. Gross product originating data, often referred to as “value added,” are available for all 14 components of GPO in the US database.

Gross Product Originating and Factor Shares

Database: US
 Start Date: 1987 for constant dollars
 1947 for current dollars
 1987 for quantity indexes
 1977 for implicit price deflators
 Frequency: Annual
 Units: Billions of current dollars or as indicated
 Source: Bureau of Economic Analysis

CONCEPT DESCRIPTION

SERIES PREFIX

Data types

Gross product originating ¹	GPO
Gross product originating, billions of constant dollars ²	GPO (SUFFIX 96)
Employee compensation	WB
Wages and salaries ³	WA
Supplements to wages and salaries ⁴	WS
Net interest	YIN
Corporate	YINC
Noncorporate	YINN
Profit type income ³	ZY

Noncorporate	CCAN
Corporate	CCAC
Indexes of real GPO by industry, 1996=100	J96GPO
Implicit price deflator for GPO, 1996=100	PDGPO

¹ GPO, often referred to as "value added", is the contribution of each industry to GDP. It is equal to the industry's gross output (sales or receipts or other operating income, plus inventory change) minus its intermediate inputs (consumption of goods and services purchased from other industries or imported). The current-dollar GPO estimates are measured as the sum of distributions by industry of the components of gross domestic income.

² To form the complete series code, the _96 must be placed after the suffix (e.g., the series code for gross product originating in billions of constant \$ for metal mining is GPO10_96). If the suffix ends in a letter, the underscore is not used, (e.g., for mining the series code is GPOMIN96).

³ Calculated by Global Insight.

⁴ For supplements to wages/salaries in construction and manufacturing, the correct prefix is AWS. The codes are AWSCON and AWSMFG respectively.

2 – INVESTMENT/CONSTRUCTION

2.1 – Capital Stock/Fixed Assets

DESCRIPTION

Fixed reproducible tangible wealth (capital stock) data for private residential, private nonresidential, government and consumer capital are included in this section. Capital stock consists of equipment and structures owned by business, government and government enterprises, and household institutions. Net stock is calculated by using empirical evidence on prices of used equipment and structures in resale markets.

SOURCE

Bureau of Economic Analysis, Survey of Current Business

UPDATE SCHEDULE

Annual. Usually published in the September or October Survey.

REVISIONS

Data are revised in conjunction with the National Income and Product Accounts tables each July.

COLLECTION METHOD

The data are derived from the expenditure flows of the National Income and Product Account (NIPA) tables. The NIPA series are modified, primarily to revalue transfers of assets used between types of owners, and are supplemented to provide detail not available in the NIPA tables.

2.2 – Private Fixed Investment in Equipment and Software

DESCRIPTION

Private fixed investment in equipment and software are available in detail on a quarterly basis. Nonresidential and residential totals conform to the National Income and Product Accounts. The detail is derived by using a commodity-flow method of estimation based on shipments. Capital goods purchased by business are net of retail sales to consumers, government purchases and exports. Imports of durable goods sold to business are included.

SOURCE

Bureau of Economic Analysis, unpublished data

UPDATE SCHEDULE

Monthly, the day after the detailed National Income and Product Accounts are released.

REVISIONS

Each quarter undergoes two revisions. The first month a preliminary figure is released. This figure is revised in the second month and then again in the third month following the same pattern as the National Income and Product Accounts. Major revisions occur in July and cover three years of data. The last major benchmark revision was in early 1996.

COLLECTION METHOD

BEA obtains its primary source material from the Census Bureau drawing heavily on the Annual Survey of Manufactures and the Census of Manufactures.

Private Fixed Investment in Equipment and Software

Database: US
 Frequency: Quarterly
 Units: Billions of current dollars and chained (1996), and index base: 1996 = 100
 Adjustment: Seasonally adjusted annual rate

2.3 – Construction Statistics

DESCRIPTION

The majority of the Construction Statistics deal with the value of new construction put-in-place which is a measure of the estimated value of all public and private construction activity. This value is based on the cost of labor, materials, overhead, equipment, architectural and engineering fees and expected profit. Various construction indices are also available. They are reported on a monthly, quarterly, semiannual or annual basis.

SOURCE

Bureau of Census, Construction Expenditures press release and advance tables of Construction Review; Bureau of Economic Analysis, unpublished data

UPDATE SCHEDULE

Monthly, beginning of the month. The BEA unpublished data are updated the day after the detailed National Income and Product Accounts data are released.

REVISIONS

Statistics for the current month are preliminary estimates. Revisions to all components are made in the following months as additional data become available. Once a year, in July, all construction data are revised at least 3 years back incorporating new information. Seasonal factors are also updated.

COLLECTION METHOD

Beginning in 1993, the Construction Expenditures Branch of the Manufacturing and Construction Division began collecting "Value of Construction Put in Place" data for private nonresidential and state and local government projects using a new classification system. This new system allows the classification of construction with one generalized coding scheme which bases project types on their end usage instead of building/nonbuilding types. Data collection for federal construction at the detailed project level began in January 2002.

With the changes in project classifications, data now presented are not directly comparable with those data previously published in the regular-format press releases and tables. Direct comparisons can only be made at the total, total private, total state and local, total federal, and total public levels for annual and not seasonally adjusted monthly data. Although some categories (lodging, office, educational, religious) seem identical to previously published data, there have been changes within the classifications that make these values incomparable. For example, private medical office buildings were classified as "office" buildings previously, but under the new classification these buildings are in "health care."

In addition, seasonally adjusted estimates in the new tables are not, in general, equal to the previously published seasonally adjusted estimates at any level of aggregation because: 1) the seasonal adjustment models, parameters, and factors for the two sets of estimates were developed from data covering different time spans, and 2) seasonal adjustment factors were derived directly for the previously published type of construction (TC) categories, but the factors for some new TC categories were derived indirectly from sub-category level seasonal adjustment. Both the previous and new TC seasonally adjusted series are valid. The previous TC series ended with May 2003 estimates and only the new TC series, estimated back to 1993, continue.

2.4 – Housing Statistics

DESCRIPTION

A wide range of housing statistics are included in this section: new privately owned housing units started, new private housing units authorized by building permits, housing units under construction, housing units completed, housing for sale and sold, and vacancy rates. Most data are available both seasonally adjusted and not seasonally adjusted.

SOURCE

Bureau of the Census; National Association of Realtors (NAR)

UPDATE SCHEDULE

Monthly. Varies depending on the data type. Housing starts are usually released in the third week of the month.

REVISIONS

Statistics for the current month are considered preliminary estimates. On the average, preliminary estimates of the number of new houses sold in the U.S. are revised about +3 percent, total completions and houses under construction are revised +1 percent and U.S. total housing starts and building permits are revised about +1 percent. Once a year, revisions incorporating new seasonal factors are computed and affect three years of historical data. The revisions apply to all housing statistics and usually occur between February and April.

COLLECTION METHOD

Statistics are estimated from sample surveys and are subject to sampling variability as well as errors of response and nonreporting.

NOTE

The number of permit issuing places has changed periodically over the years, e.g., from 13,000 to 14,000 in April 1973, to 16,000 in April 1979, and then to 17,000 in February 1985, which is the current level.

3 – TRADE

3.1 – Manufacturing and Trade Sales and Inventories

DESCRIPTION

Manufacturing and Trade Sales and Inventories are comprised of manufacturers' shipments and wholesalers' and retailers' sales and their respective inventories. The combined totals make up the category of total business. The Bureau of Economic Analysis calculates the constant dollar manufacturing and trade figures.

SOURCE

Bureau of the Census, Manufacturing and Trade Sales and Inventories press release; Bureau of Economic Analysis, unpublished data

UPDATE SCHEDULE

Monthly. The Manufacturing and Trade press release is usually available mid-month. The unpublished BEA series are released the day after the GDP press release.

REVISIONS

Reflect the latest available revisions of the manufacturers, wholesalers and retailers components.

COLLECTION METHOD

Data are collected from each of the three trade divisions and then combined by the Retail Division.

NOTE

Because Manufacturing and Trade data reflect the sum of three separate divisions, benchmark revisions are incorporated into the total as they become available. In a given month, the total business figure may be the sum of revised wholesale data, revised retail data but not revised manufacturers' data. Revisions, therefore, can be uneven until all revised data become available.

With the release of January 1987 data, all Bureau of Census inventory series were redefined to a non-LIFO accounting method. Thus, if any inventories have been valued using a LIFO method the LIFO reserve has been added to that value. The LIFO reserve is the difference between a given physical stock valued on a non-LIFO basis and that same physical stock valued at LIFO. Under the old sample, LIFO reserve was not necessarily added to the LIFO portion.

For additional tables on the NIPA underlying detail, please refer to the U.S. Macroeconomic Database Manual – Volume 1.

3.2 – Wholesale Trade

DESCRIPTION

Data are available for merchant wholesalers' inventories, sales and inventory-sales ratios by trade groups. Wholesale sales are the sales of all establishments engaged in selling to retailers, jobbers, or businesses rather than to consumers. Inventories represent stocks at cost of merchandise owned by merchant wholesalers at the end of the month regardless of location except for goods held outside the U.S. The inventory-sales ratios are derived by dividing the dollar value of inventories by the dollar value of sales.

SOURCE

Bureau of the Census, Monthly Wholesale Trade Report

UPDATE SCHEDULE

Monthly, by the 10th of the month

REVISIONS

In 1986, the Census Bureau adopted a policy of concurrent seasonal adjustment. Each month, seasonally adjusted data are revised for the same period of the previous year. Once a year, usually in March, data are revised incorporating new information and are adjusted for revised seasonal factors affecting a minimum of five years.

COLLECTION METHOD

Data are based on reports of a sample of respondents. A major source of bias in the published estimates is due to imputing data for nonrespondents, for late reporters, and for data that fail edit standards. For all kinds of business combined, imputed data amounts to about 15% of the sales estimates and 25% for inventories.

3.3 – Retail Trade

DESCRIPTION

Data for retail sales and retail inventories by trade group are available monthly, both not seasonally adjusted and seasonally adjusted where applicable. Sales figures represent total sales and receipts of all establishments primarily engaged in retail trade net of refunds. They do not include sales at the retail level by manufacturers, wholesalers, service establishments and others whose primary activity is other than retail trade.

Inventories represent stocks of merchandise, valued at cost, on hand for sale by retail establishments at the end of the month. Inventory-sales ratios show the relationship of end-of-month inventories to sales during the month.

In addition, retail sales data calculated by the Bureau of Economic Analysis can be found at the end of this section. The BEA uses its own seasonal adjustment factors and also includes sales tax in its calculations. Thus, the series are not totally compatible with the Census data.

SOURCE

Bureau of the Census, Advance Monthly Retail Sales press release; Monthly Retail Trade and unpublished data from the Bureau of the Census and the Bureau of Economic Analysis; Redbook Research; International Council of Shopping Centers, Weekly Chain Store Sales Snapshot, and Retail Trends.

UPDATE SCHEDULE

Monthly, usually the second week of the month for advance monthly retail sales. Last week of the month for monthly retail trade and unpublished data. BEA retail sales data are usually updated the day after GDP is released.

REVISIONS

In 1986, the Census Bureau adopted a policy of concurrent seasonal adjustment. Each month, seasonally adjusted data are revised for the same period of the previous year. Once a year, in April, data are revised taking into account the latest available information and using rebased seasonal factors. A minimum of five years are affected. Comprehensive benchmark revisions take place every five years when a census is taken.

Implicit price deflators are often subject to revision. The time period affected varies.

COLLECTION METHOD

Retail sales and inventory estimates are developed from samples representing all sizes of firms and kinds of business in retail trade throughout the nation.

¹ The Redbook retail sales average is a sales-weighted average of annual growth in the same-store sales of a sample of large U.S. general merchandise retailers representing about 9,000 stores. Same-store sales are sales in stores continuously open for 12 months or longer. By dollar value, the average represents about 80% of the equivalent "official" retail sales series collected and published by the U.S. Department of Commerce.

4 – PRICES

4.1 – Producer Price Indexes

DESCRIPTION

Producer Price Indexes measure average changes in prices received in primary markets of the U.S. by producers of commodities in all stages of processing. Producer Price Indexes can be organized by stage of processing or by commodity. The stage of processing structure organizes products by degree of fabrication. The commodity structure organizes products by similarity of end-use or material composition. Various indexes are available monthly, quarterly and/or annually.

SOURCE

Bureau of Labor Statistics, [Producer Price Indexes](#)

UPDATE SCHEDULE

Monthly, usually around the second Friday of each month.

REVISIONS

The fourth month previous to the current month is subject to revision based on more comprehensive information.

COLLECTION METHOD

Price data are generally collected monthly. Respondents are asked to provide net prices or to provide all applicable discounts. Most prices are obtained directly from producing companies on a voluntary and confidential basis; some prices are taken from trade publications or from other government agencies. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

NOTE

With the release of data for January 2004, the Producer Price Index program changed its basis for industry classification from the 1987 Standard Industrial Classification (SIC) system to the [North American Industry Classification System](#) (NAICS). Developed in cooperation with Canada and Mexico, NAICS represents one of the most profound changes for statistical programs focusing on emerging economic activities. The system was developed using a production-oriented conceptual framework, grouping establishments into industries based on the activity in which they are primarily engaged.

4.2 – Consumer Price Index

DESCRIPTION

The Consumer Price Index is a measure of the average change in prices over time in a fixed market basket of goods and services. Consumer Price Indexes are available monthly for both all urban consumers and wage earners and clerical workers. Many indexes are available on a seasonally adjusted basis.

Monthly, mid-month

REVISIONS

Once a year, the seasonally adjusted Consumer Price Indexes are revised based upon new seasonal factors. This revision occurs with the release of January data and affects a minimum of five years of data.

COLLECTION METHOD

The Consumer Price Index is based on monthly prices of various items and services collected from tenants, owner-occupants of homes, retail stores and service establishments in 85 urban areas. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in the other areas.

NOTE

In 1988, most Consumer Price Indexes were rebased to 1982-84=100 from 1967=100 to coincide with the updated expenditure weights from the Consumer Expenditure Survey. Indexes with a base later than December 1981 were not rebased.

More detail on the Consumer Price Indexes is available in Global Insight's Consumer Price Index Database (CPI).

4.3 – Department Store Inventory Price Index

DESCRIPTION

The Department Store Inventory Price Index is an inventory-weighted price index of goods carried by department stores designed for use in preparing income tax returns by department stores. Categories available are soft and durable goods. Data are reported monthly.

SOURCE

Bureau of Labor Statistics

UPDATE SCHEDULE

Monthly, mid-month

REVISIONS

None

COLLECTION METHOD

The Department Store Inventory Price Indexes are computed by a fixed weight aggregate procedure analogous to that used in the Consumer Price Index, e.g., as an average of price changes (relatives) weighted by inventory values. The inventory data are collected from a sample of department stores across the U.S. Whenever the weights or samples of items and cities are changed; the indexes are linked to form a continuous series. January 1941 is the reference base.

Bureau representatives in large cities, according to established procedures, collect the retail prices upon which the indexes are based for the Consumer Price Index. Prices are collected in accordance with predetermined specifications to insure obtaining the same quality of article from period to period.

4.4 – Spot Price Indexes

DESCRIPTION

This section includes detailed spot prices, weekly price indexes, Special Drawing Rate indexes and futures indexes. The indexes measure price trends of those commodities that are particularly sensitive to factors affecting the spot and futures markets. They are independent of the monthly producer price index.

SOURCE

Commodity Research Bureau, The Economist and U.S. Department of Agriculture

UPDATE SCHEDULE

Spot price index, every Friday; futures price index, every Wednesday; The Economist, early in the week.

REVISIONS

Data may be revised for one prior week.

COLLECTION METHOD

Prior to May 1981, all Tuesday spot market prices and indexes were obtained from the Bureau of Labor Statistics (BLS). Because of budget cutbacks, the BLS discontinued collecting and publishing the data. Actual spot prices are being collected by DRI-WEFA using the BLS sources. The Commodity Research Bureau has undertaken the task of calculating the indexes based on the BLS formula and is now the primary source for these indexes.

Spot Prices and Price Indexes

Database: US
 Frequency: Week ends on Tuesday
 Units: Index base: 1967 = 100
 Adjustment: Not seasonally adjusted or as indicated
 Source: Commodity Research Bureau or as indicated
 Note: As of May 1981, spot market price indexes are obtained from the Commodity Research Bureau based on "The Bureau of Labor Statistics Formula." Prior to that, they were obtained from the BLS.

4.5 – U.S. Import and Export Price Indexes

DESCRIPTION

Import and export price indexes measure the average change in prices over time in a fixed market basket of goods imported into the United States from a foreign port or exported out of the United States to a foreign port. Data are broken down by the end-use classification system, a structure used by the Department of Commerce in the construction of the foreign trade section of the National Income and Product Accounts. Seasonally adjusted indexes are not available.

SOURCE

Bureau of Labor Statistics (BLS), Division of International Prices, U.S. Import and Export Price Indexes

UPDATE SCHEDULE

Monthly, at the end of the month. Quarterly, in January, April, July and October

REVISIONS

The BLS revises the index weights and base year every five years in order to keep the indexes reflective of the international trading patterns of U.S. buyers and sellers. Each month the two previous months data are revised.

COLLECTION METHOD

Price data are collected by confidential mail questionnaire for approximately 22,000 products from over 8,300 companies. Respondents are requested to supply the net transaction price for the pricing month. The index series reflect prices for the month shown. Both indexes use a modified Laspeyres formula. The import products are weighted and classified by the 1985 tariff schedule of the United States annotated (TSUSA). Import prices are "free on board" (F.O.B.) "foreign port or cost, insurance and freight" (C.I.F.) U.S. port transaction prices. The export products are weighted and classified by the 1985 schedule B classification system of the U.S. Bureau of Census. Export prices are F.O.B. factory or "free alongside ship" (F.S.) transaction prices. The monthly indexes are constructed from subsets of the samples used in the quarterly index series.

5 – CONSUMER/DEMOGRAPHIC

5.1 – Personal Income

DESCRIPTION

Personal income is the sum of wage and salary disbursements, proprietors' income, rental income of persons, dividends, personal interest income, and transfer payments less personal contributions for social insurance. Disposition of personal income covers personal tax and non-tax payments, disposable personal income, personal outlays, and personal saving. In addition, disposable personal income in 1996 dollars is available, and equals the current dollar figure divided by the implicit price deflator for personal consumption expenditures. The monthly estimate for personal saving as a percentage of disposable personal income is calculated as a centered-three-month moving average.

Additional unpublished data relating to income are also presented in this section, including government wages and salaries, wage supplements, employment compensation, federal government expenditures, contributions for OASDHI and tax rates.

SOURCE

Bureau of Economic Analysis, Personal Income and Outlays
Bureau of Economic Analysis, unpublished data

UPDATE SCHEDULE

Monthly, the day after the release of the GDP press release

REVISIONS

Every month, two to five months of data may be revised. Major revisions follow the National Income and Product Account (NIPA) schedule. Every July, a comprehensive revision covers a THREE-YEAR period incorporating information not previously available.

In early 1996, all of the data were revised to reflect the major benchmark revision of NIPA.

COLLECTION METHOD

Varies according to specific component. Inputs include data from the BLS, the U.S. Office of Personnel Management, the Department of Defense, Census and the BEA. Estimates are also based on information provided by the Federal government, the Federal Reserve, some of the major financial intermediaries, the Social Security Administration and the Veterans' Administration.

5.2 – Personal Consumption Expenditures

DESCRIPTION

Personal consumption expenditures are goods and services purchased by individuals, operating expenses of nonprofit institutions, and the value of food, fuel, clothing, rent of dwellings and financial services received in kind by individuals. Data are available for approximately 200 categories and are expressed in current dollars, in chained 2000 dollars, and also as implicit price deflators.

SOURCE

Bureau of Economic Analysis (BEA), unpublished data

UPDATE SCHEDULE

Monthly and quarterly, the day after the detailed National Income and Product Account data are released by the BEA.

REVISIONS

Monthly: two to five months of data may be revised.

Quarterly: each quarter undergoes two revisions. The first month a preliminary figure is released. This figure is revised in the second month and then again in the third month following the same pattern as the National Income and Product Accounts.

Major revisions occur in July and are related to revisions of the National Income and Product Accounts (NIPA). The usual July revision covers three years of data. In early 1996 the data were rebased to reflect the major benchmark revision of NIPA.

COLLECTION METHOD

The BEA collects data from a variety of sources and uses appropriate Consumer Price Indexes to derive constant dollar figures. Constant dollar figures lag current dollar figures by one month because Consumer Price Indexes for the most current month are not available until after the BEA releases the data for consumer expenditures.

Personal Consumption Expenditures by Major Type of Product and Expenditure

Database: US
 Frequency: As indicated
 Units: Billions of current dollars
 Adjustment: Monthly and quarterly data are seasonally adjusted at annual rates

5.3 – Population

DESCRIPTION

This section contains annual population data and population projections from the Bureau of the Census. Such varied demographic statistics as birth rates, death rates, school enrollment figures, family size and marital status are available. Population projections are revised following each census. Data available are based on the 1980 Census and represent the “middle, high and low” series which incorporate the middle, high and low assumptions for each of the following three components fertility, mortality and net immigration levels.

SOURCE

Bureau of the Census, Annual Population Estimates (P25), Projections of the Population of the United States and Population Profile of the United States (P20)

UPDATE SCHEDULE

Annual

REVISIONS

Annual data are usually available in the Spring. Revisions affect several years incorporating statistics not previously available.

COLLECTION METHOD

A comprehensive Census covering the total population is taken every ten years. Data for intercensal years reflect the fluctuation in the number of births over time modified by changes in levels of immigration and mortality.

Annual Population Estimates and Projections

6 – EMPLOYMENT

6.1 – Employment Situation: Household Survey

DESCRIPTION

Data in this section are analyzed and published by the Bureau of Labor Statistics (BLS) and are derived from the Current Population Survey. The survey is conducted by the Bureau of the Census for the BLS and is commonly referred to as the household survey. The definition of population throughout this section refers to population 16 years of age and over, exclusively, and, thus, should not be confused with population data as reported by the Bureau of the Census.

There are thirteen categories of data represented: the status of the noninstitutional population and of the total noninstitutional population; civilian labor force levels, and participation rates based on those levels; civilian employment and unemployment levels, and unemployment rates; number of persons at work and at work less than 35 hours, and number of persons with a job but not at work; employment level by occupation and by industry and occupation, and number of hours at work; and number of persons not in the labor force.

SOURCE

Bureau of Labor Statistics, Employment Situation, Employment and Earnings and unpublished data.

UPDATE SCHEDULE

Monthly. Key statistics are updated from the Employment Situation, usually on the first Friday of the month. Detail is updated by tape by the following Monday. Some industry and occupation employment data are updated from Employment and Earnings.

REVISIONS

Annual. Data from Household Survey are revised with the release of December data taking into account additional information and revised seasonal factors. The revision usually affects five years of data.

COLLECTION METHOD

Data are collected through a survey of approximately 60,000 households. Interviews are conducted with those 16 years of age and over in 50 states and the District of Columbia. All data are based on the status reported for the calendar week including the 12th of the month.

MNEMONIC DESIGN

The mnemonic design for the labor force data is as follows:

The first 3 characters designate the data type, e.g. civilian labor force (NLC)

The fourth character designates sex: Total (T), Male (M), or Female (F)

The fifth character designates race: Total (T), White (W), Black (B), Black and Other (O)

The sixth character plus designates the specific category.

_U is used to designate data that are not seasonally adjusted. Please note that population data, by definition, are not subject to seasonality.

A periodicity prefix is used for series that are available quarterly (Q) and/or annually (A).

NOTE

With the release of January 1983 data, the BLS introduced a new definition of the labor force that includes resident armed forces in addition to its traditional civilian labor force concept. The currently published series of noninstitutional population is defined as civilian noninstitutional population plus resident armed forces. Total noninstitutional population, no longer published but is still available on tape, is defined as civilian noninstitutional population plus total armed forces including armed forces overseas.

With the release of January 1986 data, the BLS introduced a new definition of full-time labor force and part-time labor force in order to more accurately reflect the part-time job market. The classification of employed persons working part-time for economic reasons was split in two: part-time for economic reasons, usually work full-time, and part-time for economic reasons, usually work part-time. The first segment is included in the full-time labor force measure; the latter, in the part-time measure. Please note that these definitions are in addition to the traditional ones used. Traditionally, the total "working part-time for economic reasons" is a component of the full-time labor force.

¹ Data is not available on a seasonally adjusted basis.

² Persons at work exclude employed persons who were absent from their jobs during the entire reference week for reasons such as vacation, illness, or industrial dispute. Part-time for non-economic reasons excludes persons who usually work full time but worked only 1 to 34 hours during the reference week for reasons such as holidays, illness, and bad weather.

Employment Smoothed for Population Controls

Database: US
 Frequency: Monthly
 Units: Thousands of persons
 Adjustment: Seasonally adjusted
 Source: Bureau of Labor Statistics

<u>SERIES DESCRIPTION</u>	<u>SERIES CODE</u>	<u>START DATE</u>
Household Survey employment smoothed for population controls ¹	EMCTTSPC	1990
Household Survey employment smoothed for population controls and adjusted to a payroll concept ²	EMCTTSPCAPC	1994

¹ This series reflects seasonally adjusted household survey employment that has been revised from January 1990-December 2003 to smooth out the effects of population control revisions introduced in January 2000, 2003, and 2004. This series is for historical comparison only and will not be updated monthly.

² This series represents not seasonally adjusted household survey employment that has been revised to smooth out the effects of population control revisions introduced in January 2000, 2003, and 2004. The data were then adjusted to an employment concept more similar to the payroll survey by subtracting from total employment agriculture and related employment, the self-employed, unpaid family and private household workers, and workers on unpaid absences, and then adding nonagricultural wage and salary multiple jobholders. The resulting employment series was then seasonally adjusted. This series will be updated each month on the same day as the Employment Situation. Because BLS is using concurrent seasonal adjustment, the entire history is subject to revision each month.

6.2 – Employment Situation: Establishment Data

DESCRIPTION

Monthly employment and earnings establishment data based on nonagricultural payrolls are available to the 6-digit NAICS code level. Data types include employees (total, women, production workers), average weekly earnings, average weekly hours, average hourly earnings and average weekly overtime hours. In addition, the following indexes are available weekly hours, and weekly payrolls. Gross average weekly earnings in 1992 dollars for aggregates are also available as well as hourly earnings excluding overtime for 2-digit levels of classification.

SOURCE

Bureau of Labor Statistics, [Employment Situation](#) and [Employment and Earnings](#).

UPDATE SCHEDULE

Monthly, beginning of the month. In addition to the latest figures being available, the two prior months are usually revised (see note). Annual series are updated with preliminary data in March with the release of the January Employment and Earnings data and are further revised in June with the annual Employment and Earnings revision.

REVISIONS

Benchmark revisions are generally made to employment and earnings data annually. The source of information for the benchmark revision is employment data collected by state agencies on establishments covered by state unemployment insurance laws. It is estimated that these data cover 98% of all nonagricultural employees. The balance is obtained from the Social Security Administration, the Interstate Commerce Commission and other private and government agencies. Establishment data are revised in June. Revisions affect a minimum of five years at a time.

COLLECTION METHOD

State agencies receive data collected through the payroll reports of cooperating establishments. This information is used for state data and forwarded to the BLS for use in compiling national data. The data exclude information on proprietors, the self-employed, volunteer, family, farm and domestic workers. Military personnel and employees of the Central Intelligence and National Security agencies are also excluded.

NOTE

Every month, key variables are updated from the Employment Situation on the day of its release. Full detail of Employment and Earnings establishment data ("B" tables) is updated by tape two days after the Employment Situation is released.

6.3 – Employment and Earnings: Household Survey

DESCRIPTION

Data in this section are analyzed and published by the Bureau of Labor Statistics (BLS) and are derived from the Current Population Survey. The survey is conducted by the Bureau of the Census for the BLS and is commonly referred to as the household survey. The definition of population throughout this section refers to population 16 years of age and over, exclusively, and, thus, should not be confused with population data as reported by the Bureau of the Census.

There are thirteen categories of data represented: the status of the noninstitutional population and of the total noninstitutional population; civilian labor force levels, and participation rates based on those levels; civilian employment and unemployment levels, and unemployment rates; number of persons at work and at work less than 35 hours, and number of persons with a job but not at work; employment level by occupation and by industry and occupation, and number of hours at work; and number of persons not in the labor force.

SOURCE

Bureau of Labor Statistics, Employment Situation, Employment and Earnings and unpublished data

UPDATE SCHEDULE

Monthly. Key statistics are updated from the Employment Situation, usually on the first Friday of the month. Detail is updated by tape by the following Monday. Some industry and occupation employment data are updated from Employment and Earnings.

REVISIONS

Annual. Data from Household Survey are revised with the release of December data taking into account additional information and revised seasonal factors. The revision usually affects five years of data.

COLLECTION METHOD

Data are collected through a survey of approximately 60,000 households. Interviews are conducted with those 16 years of age and over in 50 states and the District of Columbia. All data are based on the status reported for the calendar week including the 12th of the month.

MNEMONIC DESIGN

The mnemonic design for the labor force data is as follows:

The first 3 characters designate the data type, e.g. civilian labor force (NLC)

The fourth character designates sex: Total (T), Male (M), or Female (F)

The fifth character designates race: Total (T), White (W), Black (B), Black and Other (O)

The sixth character plus designates the specific category.

_U is used to designate data that are not seasonally adjusted. Please note that population data, by definition, are not subject to seasonality.

A periodicity prefix is used for series that are available quarterly (Q) and/or annually (A).

NOTE

With the release of January 1983 data, the BLS introduced a new definition of the labor force that includes resident armed forces in addition to its traditional civilian labor force concept. The currently published series of noninstitutional population is defined as civilian noninstitutional population plus resident armed forces. Total noninstitutional population, no longer published but is still available on tape, is defined as civilian noninstitutional population plus total armed forces including armed forces overseas.

With the release of January, 1986 data, the BLS introduced a new definition of full-time labor force and part-time labor force in order to more accurately reflect the part-time job market. The classification of employed persons working part-time for economic reasons was split in two: part-time for economic reasons, usually work full-time, and part-time for economic reasons, usually work part-time. The first segment is included in the full-time labor force measure; the latter, in the part-time measure. Please note that these definitions are in addition to the traditional ones used. Traditionally, the total "working part-time for economic reasons" is a component of the full-time labor force.

¹ Includes some persons who were not asked if they want a job.

² Persons who had a job in the prior 12 months must have searched since the end of that job.

³ Includes: believes no work available, could not find work, lacks necessary schooling or training, employer thinks too young or old, and other types of discrimination.

⁴ Includes those that did not actively look for work in the prior 4 weeks for such reasons as child-care and transportation problems, as well as a small number for which reason for nonparticipation was not ascertained.

¹ Includes some persons who were not asked if they want a job.

² Persons who had a job in the prior 12 months must have searched since the end of that job.

³ Includes: believes no work available, could not find work, lacks necessary schooling or training, employer thinks too young or old, and other types of discrimination.

⁴ Includes those that did not actively look for work in the prior 4 weeks for such reasons as child-care and transportation problems, as well as a small number for which reason for nonparticipation was not ascertained.

6.4 – Employment and Earnings: Establishment Data

DESCRIPTION

Monthly employment and earnings establishment data based on nonagricultural payrolls are available to the 6-digit NAICS code level. Data types include employees (total, women, production workers), average weekly earnings, average weekly hours, average hourly earnings and average weekly overtime hours. In addition, the following indexes are available weekly hours, and weekly payrolls. Gross average weekly earnings in 1992 dollars for aggregates are also available as well as hourly earnings excluding overtime for 2-digit levels of classification.

SOURCE

Bureau of Labor Statistics, [Employment Situation](#) and [Employment and Earnings](#)

UPDATE SCHEDULE

Monthly, beginning of the month. In addition to the latest figures being available, the two prior months are usually revised (see note). Annual series are updated with preliminary data in March with the release of the January Employment and Earnings data and are further revised in June with the annual Employment and Earnings revision.

REVISIONS

Benchmark revisions are generally made to employment and earnings data annually. The source of information for the benchmark revision is employment data collected by state agencies on establishments covered by state unemployment insurance laws. It is estimated that these data cover 98% of all nonagricultural employees. The balance is obtained from the Social Security Administration, the Interstate Commerce Commission and other private and government agencies. Establishment data are revised in June. Revisions affect a minimum of five years at a time.

COLLECTION METHOD

State agencies receive data collected through the payroll reports of cooperating establishments. This information is used for state data and forwarded to the BLS for use in compiling national data. The data exclude information on proprietors, the self-employed, volunteer, family, farm and domestic workers. Military personnel and employees of the Central Intelligence and National Security agencies are also excluded.

NOTE

Every month, key variables are updated from the Employment Situation on the day of its release. Full detail of Employment and Earnings establishment data ("B" tables) is updated by tape two days after the Employment Situation is released.

<u>SERIES DESCRIPTION</u>	<u>SERIES CODE</u>	<u>ALTERNATIVE</u>	<u>START DATE</u>
Turned product and screw, nut, and bolts (Continued)			
Bolt, nut, screw, rivet, and washers	CEU3133272203	EPMD332722NS	1958:1
Coating, engraving, heat treating, and allied activities	CEU3133280003	EPMD3328NS	1990:1
Metal coating, engraving (except jewelry and silverware), and allied services to manufacturers	CEU3133281203	EPMD332812NS	1990:1
Electroplating, plating, polishing, anodizing, and coloring	CEU3133281303	EPMD332813NS	1990:1
Other fabricated metal products	CEU3133290003	EPMD3329NS	1990:1
Metal valves	CEU3133291003	EPMD33291NS	1990:1
Fluid power valve and hose fittings	CEU3133291203	EPMD332912NS	1990:1
Other metal valve and pipe fittings	CEU3133291903	EPMD332919NS	1990:1
All other fabricated metal products	CEU3133299003	EPMD33299NS	1990:1
Ball and roller bearings	CEU3133299103	EPMD332991NS	1958:1
Other ordnance and accessories	CEU3133299503	EPMD332995NS	1990:1
All other miscellaneous fabricated metal products	CEU3133299903	EPMD332999NS	1990:1
Machinery	CEU3133300003	EPMD333NS	1990:1
Agriculture, and mining machinery	CEU3133310003	EPMD3331NS	1990:1
Agricultural implements	CEU3133311003	EPMD33311NS	1990:1
Farm machinery and equipment	CEU3133311103	EPMD333111NS	1990:1
Construction machinery	CEU3133312003	EPMD33312NS	1990:1
Industrial machinery	CEU3133320003	EPMD3332NS	1972:1
Commercial and service industry machinery	CEU3133330003	EPMD3333NS	1990:1
Photographic and photocopying equipment	CEU3133331503	EPMD333315NS	1990:1
Other commercial and service industry machinery	CEU3133331903	EPMD333319NS	1990:1
Ventilation, heating, air-conditioning, and commercial refrigeration equipment	CEU3133340003	EPMD3334NS	1990:1
Air-conditioning and warm air heating equipment and commercial and industrial refrigeration equipment	CEU3133341503	EPMD333415NS	1990:1
Metalworking machinery	CEU3133350003	EPMD3335NS	1990:1
Industrial molds	CEU3133351103	EPMD333511NS	1990:1
Machine tools (metal forming types)	CEU3133351303	EPMD333513NS	1990:1
Special die and tool, die set, jig, and fixtures	CEU3133351403	EPMD333514NS	1990:1
Other metalworking machinery	CEU3133351803	EPMD333518NS	1990:1

Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Detailed Industry (Continued)

<u>SERIES DESCRIPTION</u>	<u>SERIES CODE</u>	<u>ALTERNATIVE</u>	<u>START DATE</u>
Machinery (Continued)			
Engine, turbine, and power transmission equipment	CEU3133360003	EPMD3336NS	1990:1
Turbine and turbine generator set units	CEU3133361103	EPMD333611NS	1990:1
Other engine equipment	CEU3133361803	EPMD333618NS	1990:1
Other general purpose machinery	CEU3133390003	EPMD3339NS	1990:1
Pump and compressor manufacturing	CEU3133391003	EPMD33391NS	1990:1
Measuring and dispensing pump	CEU3133391303	EPMD333913NS	1990:1
Material handling equipment	CEU3133392003	EPMD33392NS	1990:1
Conveyor and conveying equipment	CEU3133392203	EPMD333922NS	1972:1
All other general purpose machinery	CEU3133399003	EPMD33399NS	1990:1
Computer and electronic products	CEU3133400003	EPMD334NS	1990:1
Computer and peripheral equipment	CEU3133410003	EPMD3341NS	1990:1
Other computer peripheral equipment	CEU3133411903	EPMD334119NS	1990:1
Communications equipment	CEU3133420003	EPMD3342NS	1990:1
Radio and television broadcasting and wireless communications equipment	CEU3133422003	EPMD33422NS	1990:1
Audio and video equipment	CEU3133430003	EPMD3343NS	1990:1
Semiconductor and other electronic component	CEU3133440003	EPMD3344NS	1990:1
Bare printed circuit board	CEU3133441203	EPMD334412NS	1990:1
Semiconductor and related devices	CEU3133441303	EPMD334413NS	1972:1
Printed circuit assembly (electronic assembly)	CEU3133441803	EPMD334418NS	1990:1
Other electronic components	CEU3133441903	EPMD334419NS	1990:1
Navigational, measuring, electromedical, and control instruments	CEU3133450003	EPMD3345NS	1990:1
Instruments and related products manufacturing for measuring, displaying, and controlling industrial process variables	CEU3133451303	EPMD334513NS	1972:1
Instrument manufacturing for measuring and testing electricity and electrical signals	CEU3133451503	EPMD334515NS	1972:1
Irradiation apparatus	CEU3133451703	EPMD334517NS	1990:1
Other measuring and controlling devices	CEU3133451903	EPMD334519NS	1990:1

Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Detailed Industry (Continued)

<u>SERIES DESCRIPTION</u>	<u>SERIES CODE</u>	<u>ALTERNATIVE</u>	<u>START DATE</u>
Electrical equipment, appliance, and components	CEU3133500003	EPMD335NS	1990:1
Electric lighting equipments	CEU3133510003	EPMD3351NS	1990:1
Electric lamp bulb and parts	CEU3133511003	EPMD33511NS	1972:1
Lighting fixture manufacturing	CEU3133512003	EPMD33512NS	1990:1
Household appliances	CEU3133520003	EPMD3352NS	1972:1
Electrical equipment	CEU3133530003	EPMD3353NS	1990:1
Motor and generators	CEU3133531203	EPMD335312NS	1972:1
Switchgear and switchboard apparatus	CEU3133531303	EPMD335313NS	1958:1
Relay and industrial controls	CEU3133531403	EPMD335314NS	1990:1
Other electrical equipment and components	CEU3133590003	EPMD3359NS	1990:1
Wiring devices	CEU3133593003	EPMD33593NS	1972:1
Current-carrying wiring devices	CEU3133593103	EPMD335931NS	1972:1
All other electrical equipment and components	CEU3133599003	EPMD33599NS	1990:1
Transportation equipment	CEU3133600003	EPMD336NS	1990:1
Motor vehicles	CEU3133610003	EPMD3361NS	1990:1
Automobile and light duty motor vehicles	CEU3133611003	EPMD33611NS	1990:1
Automobiles	CEU3133611103	EPMD336111NS	1990:1
Light truck and utility vehicles	CEU3133611203	EPMD336112NS	1990:1
Heavy duty trucks	CEU3133612003	EPMD33612NS	1990:1
Motor vehicle bodies and trailers	CEU3133620003	EPMD3362NS	1990:1
Motor vehicle bodies	CEU3133621103	EPMD336211NS	1990:1
Truck trailers	CEU3133621203	EPMD336212NS	1964:1
Travel trailers and campers	CEU3133621403	EPMD336214NS	1990:1
Motor vehicle parts	CEU3133630003	EPMD3363NS	1990:1
Motor vehicle gasoline engine and engine parts	CEU3133631003	EPMD33631NS	1990:1
Gasoline engine and engine parts	CEU3133631203	EPMD336312NS	1990:1
Motor vehicle electrical and electronic equipments	CEU3133632003	EPMD33632NS	1990:1
Other motor vehicle electrical and electronic equipments	CEU3133632203	EPMD336322NS	1990:1
Motor vehicle steering and suspension components (except spring)	CEU3133633003	EPMD33633NS	1990:1
Motor vehicle transmission and power train parts	CEU3133635003	EPMD33635NS	1990:1
Motor vehicle seating and interior trim	CEU3133636003	EPMD33636NS	1990:1
Motor vehicle metal stamping	CEU3133637003	EPMD33637NS	1972:1
Other motor vehicle parts	CEU3133639003	EPMD33639NS	1990:1
All other motor vehicle parts	CEU3133639903	EPMD336399NS	1990:1

Average Hourly and Weekly Earnings of Production or Nonsupervisory Workers on Private Nonfarm Payrolls by Detailed Industry

Database: US
Frequency: Monthly
Units: **Average hourly earnings (AHP)** is in dollars per hour; **average weekly earnings (AWP)** is in dollars per week
Adjustment: Not seasonally adjusted
Source: Employment and Earnings, tables B-11 and B-15
Note: To obtain average weekly earnings data, replace the last 2-digits of the series codes listed below (06) with 04. For alternative codes, replace prefix AWP with AHP.

Average Hourly and Weekly Earnings of Production or Nonsupervisory Workers¹ on Private Nonfarm Payrolls by Major Industry and Selected Industry Detail, in Constant Dollars

Database: US
Frequency: Monthly
Units: **Average hourly earnings (AHE)** is in constant dollars per hour; **Average weekly earnings (AWE)** is in constant dollars per week
Adjustment: Seasonally and not seasonally adjusted
Series Prefix: **CEU** = Not seasonally adjusted. For alternative codes, append suffix NS (i.e., AWEEAPRNS)
CES = Seasonally adjusted
Source: Employment and Earnings, tables B-11 and B-17
Note: To access **average hourly earnings** data, replace the last 2 digits of the series codes (**51**) listed below with **49**. For alternative series codes, replace prefix **AHE** with **AWE**.

6.5 – Productivity and Costs

DESCRIPTION

Productivity and cost indexes reflect the relationship between output in real terms and the labor time involved in its production. The measures show the joint effects of a multiple of factors including changes in technology, capital investment, level of output, capacity utilization, energy and materials, as well as labor input. They do not measure the specific contributions of labor, capital, or any other single factor of production.

Unit labor cost measures the cost of labor input required to produce one unit of output and is derived by dividing compensation in current dollars by output in constant dollars. Likewise, gross domestic product in constant dollars is the basis for output per hour measures. Compensation includes: direct payments to labor, i.e., wages and salaries including executive compensation, commissions, tips, bonuses, and payments in kind representing income to recipients; and supplements consisting of employer contributions to funds for social insurance, private pension, health and welfare plans, compensation for injuries and the like. Real compensation consists of compensation per hour adjusted for price changes using the CPI for all urban consumers. Total unit cost is the sum of labor and non-labor costs. Unit non-labor cost includes depreciation, interest, rent and indirect taxes. Unit profits include corporate profits with inventory valuation and capital consumption adjustments.

SOURCE

Output data are from the Bureau of Economic Analysis (BEA), U.S. Department of commerce, and modified by the Bureau of Labor Statistics (BLS). Capital measures are based on data supplied by BEA and the U.S. Department of Agriculture.

UPDATE SCHEDULE

Bimonthly or monthly. Different sectors are updated at different times.

REVISIONS

Vary, depending on revision schedule of source data.

COLLECTION METHOD

The Bureau of Economic Analysis supplies estimates of constant dollar gross domestic product for the business economy and its major sectors and develops employee compensation data as part of the National Income and Product Accounts. The BLS Current Employment Statistics is the source of hours and employment data.

¹ The private business sector includes all gross domestic product except output of general government, government enterprises, non-profit institutions, the rental value of owner-occupied real estate, and the output of paid employees of private households. The private non-farm business sector excludes farms but includes agricultural services.

² Output per unit of combined labor and capital inputs.

³ Gross domestic product originating in the sector, superlative chained index.

⁴ Index of the hours at work of all persons including employees, proprietors, and unpaid family workers classified by education, work experience, and gender. This superlative chain index is computed by combining changes in the hours of each education, experience, and gender group weighted by each group's share of labor compensation.

⁵ A measure of the flow of capital services used in the sector

⁶ Labor input combined with capital input, using shares of costs as weights to form a superlative chained index.

⁷ Sector output per combined units of capital, hours, energy, non-energy materials, and purchased business services

⁸ Manufacturing gross output excluding transactions between mfg establishments, superlative chained index

6.6 – Employment Cost Index

DESCRIPTION

The Employment Cost Index (ECI) measures the rate of change in employee compensation, which includes wages, salaries, and employers' cost for employee benefits. The wage and salary component of the index is an average straight-time hourly earnings in a given occupation and is defined as total earnings before deductions, excluding premium payments for overtime, weekend and late-shift work. Earnings do include production bonuses, commissions and cost-of-living allowances. They are computed on an hourly basis. The benefits portion of the data includes hours-related benefits such as premium pay for overtime, vacations, sick leave; supplemental pay including shift differentials and severance pay; insurance such as life insurance, accident insurance and health benefits; pension and savings plans; and legally required benefits such as social security and workers' compensation. Coverage in this section includes indexes measuring changes in total compensation costs, indexes measuring changes in wages and salaries and indexes measuring changes in benefits.

REVISIONS

None

COLLECTION METHOD

Data are collected for both the private and public sectors. The private sector includes the total private economy, excluding farms and households. The public sector covers state and local governments, but excludes the Federal government.

Each quarter, straight-time average hourly earnings and benefit cost data are collected from a probability sample of about 10,000 occupations within 2,000 sample establishments in the private sector and about 3,700 occupations within 750 sample establishments in state and local governments.

Employment Cost Index for Total Compensation, Wages and Salaries, and Benefit Costs by Industry and Occupational Group

6.7 – Business Employment Dynamics

DESCRIPTION

The Business Employment Dynamics (BED) data are a product of a federal-state cooperative program known as Quarterly Census of Employment and Wages (QCEW), or the ES-202 program. The BED data are compiled by the U.S. Bureau of Labor Statistics (BLS) from existing quarterly state unemployment insurance (UI) records. Most employers in the U.S. are required to file quarterly reports on the employment and wages of workers covered by UI laws, and to pay quarterly UI taxes. The quarterly UI reports are sent by the State Employment Security Agencies (SESAs) to BLS and form the basis of the Bureau's establishment universe sampling frame. These reports also are used to produce the quarterly QCEW data on total employment and wages and the longitudinal BED data on gross job gains and losses. Other important Bureau uses of the UI reports are in the Current Employment Statistics (CES) program. In the BED program, the quarterly UI records are linked across quarters to provide a longitudinal history for each establishment. The linkage process allows the tracking of net employment changes at the establishment level, which in turn allows the estimation of jobs gained at opening and expanding establishments and jobs lost at closing and contracting establishments.

² The rates measure establishments gaining or losing jobs as a percentage of the average of the previous and current quarter total number of establishments.

³ Net change is the difference between the number of opening establishments and the number of closing establishments.

6.8 – Job Openings and Labor Turnover Survey (JOLTS)

DESCRIPTION

The data for the Job Openings and Labor Turnover Survey (JOLTS) are collected and compiled monthly from a sample of business establishments by the Bureau of Labor Statistics (BLS). The estimates from the JOLTS program are considered developmental and caution should be exercised in drawing conclusions from them. JOLTS estimates are released on the North American Industry Classification System (NAICS).

The JOLTS program covers all private nonfarm establishments such as factories, offices, and stores, as well as federal, state, and local government entities in the 50 states and the District of Columbia.

SOURCE

Bureau of Labor Statistics, Job Openings and Labor Turnover

UPDATE SCHEDULE

Monthly

REVISIONS

COLLECTION METHOD

Each month, data are collected in a survey of business establishments for total employment, job openings, hires, quits, layoffs and discharges, and other separations. Data collection methods include computer-assisted telephone interview, touchtone data entry, fax, and mail.

Job Openings and Labor Turnover

Database: US
 Frequency: Monthly
 Units: **Rates** are in percent; **Levels** are in thousands
 Adjustment: Not seasonally adjusted unless otherwise noted

7 – FINANCIAL

7.1 – Quarterly Financial Statistics

DESCRIPTION

Data from the Quarterly Financial Report (QFR) cover the complete Income Statement and Balance Sheet based on the 1997 North American Industry Classification System (NAICS).

SOURCE

Bureau of the Census, Quarterly Financial Report for Manufacturing, Mining and Trade

UPDATE SCHEDULE

Data are scheduled for release approximately 75 days after the end of the first, second, and third calendar quarter and approximately 95 days after the end of the fourth calendar quarter.

REVISIONS

The Quarterly Financial Report publishes 5 quarters of data at a time. With each new release of data the previous four quarters are subject to revision. Data are never revised further back than what is published in the current issue. Revisions to QFR data are attributable primarily to industry reclassifications of major corporations involved in merger/acquisition activities, restructuring of operations, economic changes, or additional information and/or corrections submitted by respondents subsequent to last quarter's publication. Only the currently published 5 quarters for the NAICS classification involved would be revised to reflect the change.

COLLECTION METHOD

The Quarterly Financial Report is based upon an extensive sample survey. Each corporation in the survey is required to provide a breakdown of gross receipts by source industry. The data are analyzed to determine the classification of each corporation.

7.2 – Miscellaneous

DESCRIPTION

Money stock measures as computed by the Federal Reserve Board are available at various levels of aggregation. Activity in savings institutions and commercial banks including investment, deposits, loans and consumer installment credit is also available. Treasury activity covering outstanding public issues and mortgage rates and money market rates are found in this section.

SOURCE

Federal Reserve Board, Treasury Bulletin, Federal Home Loan Bank Board, International Financial Statistics, Merrill Lynch.

UPDATE SCHEDULE

Weekly, monthly or quarterly, depending on the source data.

REVISIONS

Monthly money stock measures can be revised weekly. Major revisions occur at least twice a year and affect data as far back as 1959. Data are revised to account for new seasonal factors and sometimes for redefinitions.

COLLECTION METHOD

Varies, depending on the respective sources of data.

NOTE

Please refer to Global Insight's Financial Databases (FIN, DAILYFIN) for more extensive coverage of financial statistics.

8 – GOVERNMENT

8.1 – Federal Government Budget Outlays and Receipts

DESCRIPTION

Data in this section reflect Federal government budget outlays by function and Federal receipts by source. Budget net outlays by function are listed by government department.

SOURCE

Department of Treasury, Treasury Bulletin Tables FFO-1, FFO-2, FFO-3, and OFS-2, The Monthly Treasury Statement

UPDATE SCHEDULE

Monthly, toward the end of the month or quarterly with the release of the Treasury Bulletin.

REVISIONS

Net budget outlays and receipts reflect effective budget programs for the fiscal year, which begins in October. When the current month is reported, the same month a year ago may be revised.

COLLECTION METHOD

Data are collected by the Treasury Department.

9 – INTERNATIONAL

9.1 – U.S. International Merchandise Trade

DESCRIPTION

U.S. Merchandise Trade reflects both government and nongovernment imports and exports of merchandise between foreign countries and U.S. customs territory, which includes the states, the District of Columbia, Puerto Rico and the U.S. Virgin Islands. Data are available on a monthly, quarterly or annual basis.

SOURCE

Bureau of the Census, U.S. Merchandise Trade Report (FT900); FT900 Supplement; Bureau of Economic Analysis, Survey of Current Business, unpublished data.

UPDATE SCHEDULE

Monthly, quarterly and annual.

REVISIONS

Quarterly and annual data are revised with the release of the June edition of the Survey of Current Business. Number of years affected varies. Monthly data are revised with the release of January data.

COLLECTION METHOD

Data are compiled from copies of Shippers' Export Declarations and import entries filed with the U.S. customs officials.

NOTE

Census trade statistics are based on the physical movement of goods into and out of the United States. The balance-of-payments concept measures goods, which are sold, given away, or otherwise transferred from the United States to foreign ownership. Various adjustments to the Census statistics are made for timing, coverage and valuation in order to bring them into closer conformity with the balance-of-payments concept.

All imports and exports are based on the International Harmonized System (HS) classifications.

In January 1990, "undocumented" exports to Canada and reexports were distributed to the appropriate "end-use" category. The 1989 data has been recalculated to account for this change.

In July 1988, Census began seasonally adjusting the aggregate components of the trade balance and introduced adjusted and unadjusted data reported on an end-use basis.

¹ Reflects adjustments for timing, coverage, and valuation of the data compiled by the Census Bureau from documentation collected by the U.S. customs service. The major adjustments exclude military trade of the U.S. defense agencies (to avoid a double count in the U.S. Balance of Payments statistics), include additional nonmonetary gold transactions not included in the Census Bureau export and import data, include an estimate of inland freight in Canada and Mexico not in Census import data, and account for differences between the seasonally adjusted and not seasonally adjusted annual values.

U.S. government miscellaneous services ²	MIMSEROUSGBOP	1992

¹ Other private services consist of transactions with affiliated foreigners, for which no identification by type is available, and of transactions with unaffiliated foreigners. Transactions with unaffiliated foreigners consist of education services; financial services; insurance premiums and losses; telecommunications services; and business, professional and technical services. Business, professional and technical services consist primarily of advertising services; computer and data processing services; database and other information services; research, development, and testing services; management consulting and public relations services; legal services; construction, engineering, architectural and mining services; industrial engineering services; installation, maintenance and repair of equipment; and other services (including medical services).

² These government transactions include both goods and services, which cannot be separately identified. They are included to achieve a complete measure of goods and services, and to maintain comparability with the international transactions accounts.

Exports, Imports, Balance of Goods, Petroleum and Non-Petroleum End-Use Category

Database: US
 Frequency: Monthly
 Units: Millions of current and constant (2000) dollars
 Adjustment: Seasonally adjusted
 Source: Bureau of the Census, U.S. International Trade in Goods and Services (FT900)
 Note: The petroleum products aggregated in the end-use commodity classification system include virtually the same energy related petroleum products as those aggregated in the SITC. The end-use petroleum products, however, include some products such as ethane, butane, benzene and toluene, which is included in "manufactured goods".

<u>SERIES DESCRIPTION</u>	<u>CURRENT DOLLARS</u>	<u>CONSTANT DOLLARS¹</u>	<u>START DATE</u>
Trade balance			
Total, balance of payments basis	MNETEXMERBOP	----	1992.1

Petroleum	IMCVPPT	IMCVPPT00	1989.1
Non-petroleum	IMCVXPPT	IMCVXPPT00	1989.1

¹ Data began 1994.1.

² Reflects adjustments for timing, coverage, and valuation of the data compiled by the census bureau from documentation collected by the U.S. customs service. The major adjustments exclude military trade of the u.s. defense agencies (to avoid a double count in the u.s. balance of payments statistics), include additional nonmonetary gold transactions not included in the census bureau export and import data, include an estimate of inland freight in Canada and Mexico not in census import data, and account for differences between the seasonally adjusted and not seasonally adjusted annual values.

U.S. International Trade by Selected Countries and Areas

9.2 – International Transactions

DESCRIPTION

U.S. International Transactions represent the flow of goods and services between residents of the United States and residents of the rest of the world. The statistical record of economic transactions covers the following: merchandise; services, i.e. intangible output that is regarded as being transferred at the instance of performance, such as transportation, insurance, and fees for the use of capital; private and governmental capital including financial claims and ownership of property; and monetary gold, which is treated in the balance of payments in the same manner as a financial asset. The Balance of Payments is presented as a double-entry record. The complete summary as published by the Bureau of Economic Analysis (BEA) is available in this section as well as some additional detail published in the Survey of Current Business.

SOURCE

Bureau of Economic Analysis and the Survey of Current Business

UPDATE SCHEDULE

Quarterly

REVISIONS

Annual, with the release of the June edition of the Survey of Current Business. Number of years affected varies.

COLLECTION METHOD

Data are compiled by the BEA from a number of sources depending on the transaction. The Census provides trade statistics which are then adjusted to the Balance of Payments concept. The Department of Defense, the U.S. Immigration and Naturalization Service, various publications of foreign governments and international organizations, the Federal Reserve System, and U.S. individuals and firms contribute.

NOTE

As of June 12, 1990 the term “services” has been redefined to exclude investment income. Investment income is given a position of importance equal to services. Corresponding changes have been made to show that the current account is made up of merchandise trade, services, investment income, and unilateral transfers. The balance on goods and services is titled the balance on goods, services and income. The redefinition aligns the terms more closely with general usage. The balance on current account is not affected by this redefinition.

Capital gains and losses associated with currency translation adjustments have been removed from receipts of income on U.S. direct investment and from U.S. direct investment capital flows.

9.3 – Capital Movements

DESCRIPTION

This section contains information on transactions in all types of long-term domestic and foreign securities with foreigners reported by banks, brokers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners, and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly issued securities as well as transactions in, and redemptions of, outstanding issues.

SOURCE

Treasury Department, Treasury Bulletin

UPDATE SCHEDULE

Quarterly

COLLECTION METHOD

The Treasury collects information about the transfer of financial assets and other portfolio capital movements between the United States and foreigners. Commercial banks and other depository institutions, bank holding companies, security brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district Federal Reserve banks.

9.4 – International Manufacturing Productivity

DESCRIPTION

The Bureau of Labor Statistics constructs trend indexes of manufacturing labor productivity (output per hour), hourly compensation costs, and unit labor costs from three basic aggregate measures: output, total labor hours, and total compensation. The hours and compensation measures refer to employees (wage and salary earners) in Korea, Taiwan, Belgium, Denmark, and Italy. For all other countries, the measures refer to all employed persons, including employees, self-employed persons, and unpaid family workers. For all countries, the term "hours" refers to hours worked. In general, although some variations are present, the measures relate to total manufacturing as defined by the International Standard Industrial Classification (ISIC). However, the measures for France refer to mining and manufacturing less energy-related products, and the measures for Denmark include mining and exclude manufacturing handicrafts from 1960 to 1966.

Output - For most countries, the output measures are value added in manufacturing from the national accounts. However, output for Japan prior to 1970 and for the Netherlands prior to 1960 are indexes of industrial production. The national accounts measures for the United Kingdom are essentially identical to their indexes of industrial production

Labor Input - The total hours measures are developed from statistics of manufacturing employment and average hours. The total hours series used for France (from 1970 forward), Norway, Sweden, and Canada are series published with the national accounts. Where such series are not available, the measures are developed by BLS using employment figures published with the national accounts, or other comprehensive employment series, and estimates of average annual hours worked

Compensation (Labor Cost) - The compensation measures are from national accounts data. Compensation includes employer expenditures for legally required insurance programs and contractual and private benefit plans, in addition to all payments made in cash or in-kind directly to employees. For Canada, France, and Sweden, compensation is increased to account for other important taxes on payroll or employment. For the United Kingdom, compensation is reduced between 1967 and 1991 to account for subsidies. When data for the self-employed are not available, total compensation is estimated by assuming the same hourly compensation for self-employed and employees. Real compensation for the U.S. is derived using the Consumer Price Index research series (CPI-U-RS)

9.5 – International Comparisons of Hourly Compensation Costs for Production Workers in Manufacturing

INTRODUCTION

The accompanying tables present international comparisons of hourly compensation costs, hourly direct pay, and pay for time worked for production workers in manufacturing in selected countries or areas. The total compensation measures are prepared by the Bureau of Labor Statistics in order to assess international differences in employer labor costs. Comparisons based on the more readily available average earnings statistics published by many countries can be very misleading. National definitions of average earnings differ considerably; average earnings do not include all items of labor compensation; and the omitted items of compensation frequently represent a large proportion of total compensation. The total direct pay and pay for time worked measures are prepared to provide a comparable basis for analyzing the main components of total compensation.

The compensation and other pay measures are computed in national currency units and are converted into U.S. dollars at prevailing commercial market currency exchange rates. They are appropriate measures for comparing levels of employer labor costs. They do not indicate relative living standards of workers or the purchasing power of their income. Prices of goods and services vary greatly among countries, and commercial market exchange rates are not reliable indicators of relative differences in prices.

DEFINITIONS

Hourly compensation is defined as (1) hourly direct pay and (2) employer social insurance expenditures and other labor taxes. Hourly direct pay includes all payments made directly to the worker, before payroll deductions of any kind, consisting of (a) pay for time worked (basic time and piece rates plus overtime premiums, shift differentials, other premiums and bonuses paid regularly each pay period, and cost-of-living adjustments) and (b) other direct pay (pay for time not worked (vacations, holidays, and other leave, except sick leave), seasonal or irregular bonuses and other special payments, selected social allowances, and the cost of payments in kind). Social insurance expenditures and other labor taxes includes (c) employer expenditures for legally required insurance programs and contractual and private benefit plans (retirement and disability pensions, health insurance, income guarantee insurance and sick leave, life and accident insurance, occupational injury and illness compensation, unemployment insurance, and family allowances) and, for some countries, (d) other labor taxes (other taxes on payrolls or employment (or reductions to reflect subsidies), even if they do not finance programs that directly benefit workers, because such taxes are regarded as labor costs). For consistency, compensation is measured on an hours-worked basis for every country.

Hourly direct pay includes (a) pay for time worked (basic time and piece rates plus overtime premiums, shift differentials, other premiums and bonuses paid regularly each pay period, and cost-of-living adjustments) and (b) other direct pay (pay for time not worked (vacations, holidays, and other leave, except sick leave), seasonal or irregular bonuses and other special payments, selected social allowances, and the cost of payments in kind), before payroll deductions of any kind. Direct pay is also measured on an hours-worked basis for every country.

Pay for time worked includes only basic time and piece rates plus overtime premiums, shift differentials, other premiums and bonuses paid regularly each pay period, and cost-of-living adjustments (COLA's). Pay for time worked is measured on an hours-worked basis for every country.

Production workers generally include those employees who are engaged in fabricating, assembly, and related activities; material handling, warehousing, and shipping; maintenance and repair; janitorial and guard services; auxiliary production (e.g., powerplants); and other services closely related to the above activities. Working supervisors are generally included; apprentices and other trainees are generally excluded.

Hourly compensation costs, hourly direct pay, and pay for time worked are converted to U.S. dollars using the average daily exchange rate for the reference period. Changes in hourly compensation in U.S. dollars from one period to another are therefore affected by changes in currency exchange rates as well as by changes in compensation. The exchange rates used are prevailing commercial market exchange rates as published by either the U.S. Federal Reserve Board or the International Monetary Fund.

Country notes

The following are exceptions to the standard coverage and definitions explained above:

Australia: Compensation relates to production workers and nonproduction workers other than those in managerial, executive, professional, and higher supervisory positions.

Hong Kong SAR: Average of selected manufacturing industries. The industries covered accounted for about 70 percent of all persons employed in manufacturing in 1988. Compensation excludes overtime pay. Hong Kong became a Special Administrative Region (SAR) of China in July 1997.

Austria: Excludes workers in establishments considered handicraft manufacturers. (All printing and publishing and miscellaneous manufacturing establishments are classified in handicrafts.) In 1986, handicraft employment was about 35 percent of all manufacturing employment. Average compensation per employee was about 10 percent lower in manufacturing including handicrafts than in manufacturing excluding handicrafts.

Finland: Includes workers in mining and electrical power plants. For comparability with other countries, compensation excludes some obligatory training and plant facilities costs; these costs would add 1.6 percent to average hourly compensation costs in 1994.

Germany: Excludes workers in establishments considered handicraft manufacturers. In 1990, handicraft employment in the former West Germany was about 25 percent of all manufacturing employment. Average hourly earnings of production workers were about 3 percent lower in manufacturing including handicrafts than in manufacturing excluding handicrafts.

Ireland: Data refer to September for 1975-76.

Norway: Pay for time worked includes irregular bonuses; irregular bonuses account for only a small fraction of earnings. For comparability with other countries, compensation excludes some obligatory training and plant facilities costs; these costs would add 2.2 percent to average hourly compensation costs in 1994.

Portugal: Direct pay excludes profit-sharing bonuses but includes social allowances. Profit-sharing bonuses are included in social insurance expenditures.

European Union	JWSSMEU	1975
Asian NIEs ⁸	JWSSMANIE	1975

⁴ Because data for Germany (referred to as united Germany in prior news releases) are not available before 1993, data for the former West Germany only are included in the trade-weighted measures. The trade weights used to compute the average compensation cost measures for selected economic groups are relative importances derived from the sum of U.S. imports of manufactured products for consumption (custom value) and U.S. exports of domestic manufactured products (free along side (f.a.s) value) in 1999 for each country or area and each economic group. The trade data used to compute the weights are U.S. Bureau of the Census statistics of U.S. imports and exports converted to an industrial classification commodity classification system. The trade-weighted measures relate to all the countries or areas covered in the series. Data for Germany relate to the former West Germany. Estimates are computed for missing country data using the average trend in the other economies to estimate the missing data.

⁵ Organization for Economic Cooperation and Development (OECD) includes Canada, Mexico, Australia, Japan, Korea, New Zealand, and all European countries. (Mexico joined the OECD in 1994 and Korea joined in 1996, and the OECD trade-weighted measures are shown both including and excluding those countries). The European Union (formerly European Community) consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, and the United Kingdom.

⁶ Mexico joined the OECD in 1994, and Korea Joined in 1996.

⁷ Europe consists of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

⁸ Asian NIEs consists of the four newly industrializing economies of Hong Kong SAR, Korea, Singapore, and Taiwan.

10 – MISCELLANEOUS

10.1 – Transportation Statistics

DESCRIPTION

Data include airline and railroad statistics, sales, production and inventories of cars and trucks, new car prices, volume indexes on freight carried and other miscellaneous transportation statistics.

SOURCES

ICC Transportation Statistics, Motor Vehicle Manufacturers' Association, Bureau of Economic Analysis, Federal Reserve Board, Wards Communications

UPDATE SCHEDULE

Weekly, monthly, annual

REVISIONS

Seasonally adjusted data are revised to reflect updating of seasonal adjustment factors.

COLLECTION METHOD

AIRPLANE - Bureau of the Census for data beginning 1961. The data beginning 1961 are based on reports from companies whose principal business is the development and/or production of aircraft, aircraft engines, missile and spacecraft engines, missiles and/or spacecraft.

RAILROADS - Association of American Railroads and Interstate Commerce Commission. The Association's end-of-month figures for revenue freight cars are as reported to their Car Service Division by Class I roads and railroads owned and controlled private refrigerator car lines.

TRUCKS AND AUTOMOBILES – Wards Communications, Motor Vehicle Manufacturers Association of the U.S., seasonally adjusted by the Bureau of Economic Analysis.

Transportation Statistics

Database: US
 Frequency: As indicated
 Units: As indicated
 Adjustment: Not seasonally adjusted or as indicated
 Source: ICC Transportation Statistics (ICC); Wards Communications (WARDS); Bureau of Economic Analysis (BEA); Bureau of Labor Statistics (BLS); American Association of Railroads (AAR); Air Transport Association of America (ATAA); Civil Aviation Board (CAB)

<u>SERIES DESCRIPTION</u>	<u>SERIES CODE</u>	<u>START DATE</u>
Airline revenues, ATAA or as noted:		
Passenger revenues of airline certified route carriers, quarterly, millions of \$	SPCRCAIR	1960
Revenue passenger miles of airline operations, monthly, billion miles		
Domestic	NRPMDAOAIR	1954
International	NRPMIAOAIR	1970
Revenue passenger miles of certified route carriers, monthly, billion miles	NRPMCRCAIR	1960
Revenue ton-miles of airline certified route carriers, monthly, million ton-miles	NRTMCRCAIR	1960
Passenger revenue per mile, CAB, annual, cents:		
Domestic	APPRPMDAIR	1947
International	APPRPMIAIR	1947
Certified route carriers, passenger load factor, monthly, percent	RPLFCRCAIR	1967
Output, certified route air carriers, total (revenue) ton miles, annual, billions	ANRTMCRCAIR	1947
Airline total yield, major carriers, monthly, cents/revenue passenger mile	TRPMCAIR	1980
Class I railroads:		
Revenue per ton-mile, quarterly, cents, AAR	SRPTMRR	1960
Revenue ton-miles of freight, quarterly, billion ton-miles, AAR	NRTMRR	1963
Revenue per passenger-mile, annual, cents/ton-mile, ATAA	PRPMRR	1947
Revenue per ton-mile of freight, annual, cents/ton-mile, ATAA	PRTMRR	1947
Total operating revenue, quarterly, millions \$, AAR	SOPRR	1960
Operating expenses, quarterly, millions \$, AAR	EOPRR	1960
Railroad operating expenses:		
Cars of revenue freight loaded, weekly, thousands, AAR	WNRRCLD	1987

Automobiles Statistics (Continued)

<u>SERIES DESCRIPTION</u>	<u>SERIES CODE</u>	<u>START DATE</u>
Miscellaneous		
Average age of U.S. passenger cars in use, annual, years, Wards	AGECAR	1956
Fuel consumed by personal passenger vehicles, annual, billions of gallons, FHA highway statistics	UCARPGAO	1950
Licensed drivers, U.S., annual, millions, FHA highway statistics, millions	NDRVLIC	1950
Transportation services index¹ , index base: 1996=100, seasonally adjusted, U.S. Department of Transportation, Bureau of Transportation Statistics	TSI	1990
Freight ²	TSIF	1990
Passenger ³	TSIP	1990

¹ It is a measure of the month-to-month changes in the output of services provided by the for-hire transportation industries, which include railroad, air, truck, and inland waterways transportation, pipeline transportation, and local transit. The TSI is still under development and is considered experimental.

² Consists of for hire trucking (including parcel services), railroad freight services (including rail-based intermodal shipments such as containers on flat cars), inland waterways transportation, pipeline transportation (including principally petroleum and petroleum products and natural gas), and air freight. It does not include international or coastal waterborne movements, private trucking, courier services, or the U.S. Postal Service.

³ Consists of local mass transit, intercity passenger rail, and passenger air transportation. It does not include intercity bus, sight seeing services, ferry services, taxi service, private automobile usage, or bicycling and other non-motorized means of transportation.

10.2 – Miscellaneous Statistics

SOURCE

American Paper Institute, American Petroleum Institute, American Iron and Steel Institute, Bureau of Mines, Bureau of the Census, Current Industrial Reports M22O and M22P, Department of Energy, Dun and Bradstreet, Edison Electric Institute, Employment and Training Administration, Federal Reserve Bank of Cleveland, Southern Forest Association, The Economist, Western Woods Association.

UPDATE SCHEDULE

Weekly, monthly, quarterly and annual

REVISIONS

Vary, depending on the series. Often revisions are for the same period a year earlier. Seasonally adjusted unemployment claims series are revised extensively in February.

COLLECTION METHOD

Varies depending upon series.

Unemployment Insurance and Job Layoffs

Database: US
 Frequency: Weekly or as noted below
 Units: As indicated
 Adjustment: Not seasonally adjusted or as indicated
